**THE POSTMODERN CHALLENGE TO THE THEORY AND PRACTICE OF EDUCATIONAL ADMINISTRATION** 2003-01-01, 2003-01-01. Based on nearly a decade of scholarship, this is a highly focused book on the implications of postmodernism for the construction and assessment of theory and practice in educational administration. Current ideas of practice are deconstructed from the notions of sound research to the use of national standards in the preparation of educational leaders along with ways of examining and resolving the theory-practice gap. Part One of the book contains chapters dealing with the rise of postmodernism and describes its broad-based dissent from a century of thought in the field, including a penetrating examination of whether the concept of a field itself is viable. Part Two of the book explores the many ramifications of postmodernism to practice, beginning with ideas concerning educational research. These chapters tackle the tough issues of the efficacy of the Interstate Leaders Licensure Standards (ISLLC) and the national exam as examples of job deskilling and deprofessionalization in the guise of raising standards of preparation of future educational leaders. Other chapters deal with deconstructing the popular managerial ideas contained in Stephen Covey's works and dispute Joe Murphy's call for a new center of gravity in the field as reinforcing the status quo. Finally, the book tackles the issue of the theory-practice gap and indicates that new and progressive theories which anticipate problems of practice are what is required to deal with this persistent issue. The book contains many helpful exhibits in understanding the issues concerning theory and practice as well as a glossary of terms most commonly found in postmodern discourse. This book is designed for college and university programs engaged in the preparation of educational leaders for elementary, secondary schools and college administrative positions.

**Love and Health** Jerry L. Ainsworth, 2006. Love and Health is a classic account of good triumphing over evil of being given a lemon and making lemonade. It is an intimate sharing of a success story that started with anger and ended in love. Indeed, it is the tale of a personal defeat that developed into a program of love so timely and unique that for one bright shining moment it profoundly changed a university and a hospital and the people who worked there. Dr. Jerry Ainsworth was an administrator at his university when he became embroiled in a conflict with his administration. The battle became so intense and hostile that he was relieved of his

administrative post and assigned a menial punitive position This dismissal angered him to such a degree that he started a movement to oust the president or if not to get rid of him at least to embarrass him or weaken him politically After months of seething with anger he developed a life threatening medical condition that doctors told him was a direct result of anger and could soon cause his death Astonished he delved into existing research literature to determine if anger could actually kill Not only did he learn that it could he was equally surprised to discover evidence confirming the healing effects of love and of similar positive emotions Dr Ainsworth immediately incorporated these findings into his own life alleviating all symptoms of anger and pioneering the development of an undergraduate college course on love and health Although colleagues were initially apprehensive apathetic and even pessimistic toward such an idea student reactions were exactly the opposite His classes were so successful that he started a graduate course along similar lines

English,2006-02-16 The SAGE Encyclopedia of Educational Leadership and Administration presents the most recent theories research terms concepts ideas and histories on educational leadership and school administration as taught in preparation programs and practiced in schools and colleges today With more than 600 entries written by more than 200 professors graduate students practitioners and association officials the two volumes of this encyclopedia represent the most comprehensive knowledge base of educational leadership and school administration that has as yet been compiled      *Healing Souls* Eric G. Swedin,2022-08-15 In this first history of psychotherapy among the Latter day Saints Eric G Swedin describes how modern psychology has affected the healing of souls in the LDS community But he also shows how this community melded its theological doctrines with mainstream psychiatry when secular concepts clashed with fundamental tenets of Mormonism The psychological professions pervasive in twentieth century American society were viewed as dangerous by some religious communities Healing Souls describes the LDS community's mixed feelings about science and modernity while valuing knowledge Mormons feared a challenge to faith Nonetheless psychology courses were introduced at Brigham Young University and LDS psychotherapists began to introduce new ideas and practices to the community Swedin portrays the rise of professional organizations such as the Association of Mormon Counselors and Psychotherapists as well as the importance of Allen E Bergin first director of the BYU Institute for Studies in Values and Human Behavior Bergin and others paved the way for the LDS adoption of professional psychotherapy as an essential element of their cure of souls Important chapters take up LDS psychopathology feminist dissent LDS philosophies of sexuality and the LDS rejection of mainstream psychotherapy's selfist psychology on the basis of theological doctrines of family salvation eternalism and the natural man Healing Souls contributes to a more complete historical picture of the mental health professions in North America and a better understanding of how religious traditions and psychology have influenced each other
