

Study Guide for the Spring Semester Final Biology

Final: The semester final will count for 20% of your semester test average. It will be 100-150 multiple choice questions.

Note Card: For the final, you will be allowed one 4x6 index card as a notes sheet. The dimensions of the card must not exceed 4x6 and the card **MUST** be turned in at the end of the final with your name on it. All material on the card **must be handwritten**. Failure to turn in your note card (if you used one during the final) will result in a **minimum loss of 10%** of your final exam score.

Disclaimer: The majority of the topics covered on the semester final have been listed, but this is not comprehensive. Anything we have covered this semester in lecture, reading, handouts, labs, etc. is fair game for the final. This list just indicates those topics I believe that the majority of students need to review. Anything not covered in class will not appear on the final. If you have any doubts, please ask; don't just assume you won't see it.

Topics covered in class: Chapters 8,9,10,11,12,14,15 (photosynthesis, respiration, DNA and RNA; Genetics; Evolution (some));

Review Questions: The following questions need to be answered on a separate piece of paper and will be collected for credit.

Chapter 8

1. Review photosynthesis. What is the formula for photosynthesis? What are the reactants (what goes in) and products (what comes out) of both reactions? Where do the products then go?
2. What is ATP? What does it do? How is energy released from ATP?
3. What is a pigment? Why do leaves of a plant appear green?
4. Describe an experiment that we performed while studying photosynthesis.

Chapter 9

5. Define the following: anaerobic respiration, aerobic respiration, fermentation, lactic acid fermentation, alcoholic fermentation.
6. Review cellular respiration. What is the formula for cellular respiration? What are the steps in order of cellular respiration? What are the reactants (what goes in) and products (what comes out) of cellular respiration? Where do the products then go?

DNA and RNA (Chapter 12)

7. Define the following terms: Chromosome, Nucleotide, Base pairing, Gene, RNA (ribonucleic acid), Transcription, Translation, Codon, Anti-codon
8. What occurs in replication, transcription and translation? State the steps of each, where they occur and the enzymes involved.
9. Name the three parts of a DNA nucleotide and three parts of a RNA nucleotide.
10. What are the base-pairing rules for DNA? How are they different for RNA?

Spring Semester Final Study Guide

The Alcalde ,1965-05 As the magazine of the Texas Exes The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years The Alcalde serves as an intellectual crossroads where UT s luminaries artists engineers executives musicians attorneys journalists lawmakers and professors among them meet bimonthly to exchange ideas Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater The magazine s unique name is Spanish for mayor or chief magistrate the nickname of the governor who signed UT into existence was The Old Alcalde

Bahamian Students' Experiences with Mathematics in American Universities and Colleges Nikki Rochelle Cleare,2011 This longitudinal qualitative multi case study examines the mathematical experiences of three Bahamian students pursuing science degrees in American universities and its relationship to their previous mathematical experiences in their Bahamian high schools Drawing on cultural psychology and sociocultural theories of learning this study found that the relationship between the academic preparedness of the participants on their experiences with collegiate mathematics is not limited to subject content only The lessons learnt from the implied curriculum also play a role in their experiences with collegiate mathematics Of the three participants two have had to learn develop techniques for studying because they had not been sufficiently challenged in their previous environments to do so Each of the cases also highlights some powerful constructs needed for success in mathematics and at least two emphasize making connections between concepts procedures manipulatives tools and multiple approaches when solving problems This study contributes to an emerging area of research on student persistence in college level mathematics

courses as well as to the ongoing discussions in mathematics education regarding the role importance of conceptual understanding and how to promote it The study makes visible some of the ways in which students post secondary experiences with mathematics are shaped by their perception of their mathematical preparation thus providing a basis for discussions of possible curricular change in the Bahamas It also suggests that issues such as confidence and school teacher expectations of students may play a role in the development of conceptual understanding

Handbook of Distance Learning for Real-Time and Asynchronous Information Technology Education Negash, Solomon, Whitman, Michael, Woszczyński, Amy, Hoganson, Ken, Mattord, Herbert, 2008-05-31 This book looks at solutions that provide the best fits of distance learning technologies for the teacher and learner presented by sharing teacher experiences in information technology education Provided by publisher

Wall of Illusion Joseph A. Bulko, 2013-09-12 I was born in Jarabina in Northeastern Slovakia in 1939 a town of approximately 280 homes founded in 1329 The town consisted of private homes a church a school up to the 6th grade and a general store with a bar and a dance hall for the town s use for weddings and dances on special holidays I was born in 1939 at the start of World War II This was written because of the urging of my children without whose encouragement it would not have been written I hope you enjoy reading it Love Dad

Public Health Reports , 2005

Duelling Idiots and Other Probability Puzzlers Paul J. Nahin, 2012-07-22 What are your chances of dying on your next flight being called for jury duty or winning the lottery We all encounter probability problems in our everyday lives In this collection of twenty one puzzles Paul Nahin challenges us to think creatively about the laws of probability as they apply in playful sometimes deceptive ways to a fascinating array of speculative situations Games of Russian roulette problems involving the accumulation of insects on flypaper and strategies for determining the odds of the underdog winning the World Series all reveal intriguing dimensions to the workings of probability Over the years Nahin a veteran writer and teacher of the subject has collected these and other favorite puzzles designed to instruct and entertain math enthusiasts of all backgrounds If idiots A and B alternately take aim at each other with a six shot revolver containing one bullet what is the probability idiot A will win What are the chances it will snow on your birthday in any given year How can researchers use coin flipping and the laws of probability to obtain honest answers to embarrassing survey questions The solutions are presented here in detail and many contain a profound element of surprise And some puzzles are beautiful illustrations of basic mathematical concepts The Blind Spider and the Fly for example is a clever variation of a random walk problem and Duelling Idiots and The Underdog and the World Series are straightforward

introductions to binomial distributions Written in an informal way and containing a plethora of interesting historical material Duelling Idiots is ideal for those who are fascinated by mathematics and the role it plays in everyday life and in our imaginations

Handbook for Teaching Introductory Psychology Michelle Rae Hebl, Charles L. Brewer, Ludy T. Benjamin, Jr., 2001-08-01 Like its predecessors Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom It contains an organized collection of articles from Teaching of Psychology TOP the official journal of the Society for the Teaching of Psychology Division 2 of the American Psychological Association Volume III contains 89 articles from TOP that have not been included in other volumes Another distinction between this volume and its predecessors is its emphasis on testing and assessment The book is divided into two sections Section One Issues and Approaches in Teaching Introductory Psychology contains 52 articles on critical issues such as how to approach the course understanding students interests perceptions and motives students existing knowledge of psychology including their misconceptions a comparison of introductory textbooks and tips on how to evaluate them test questions and student factors affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty Section Two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline This section is organized so as to parallel the order of topics found in most introductory psychology textbooks Intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology
