Novel insights, innovation, a broader community to conduct research and to ascertain effective interventions are essential in the challenge to create organizations that are gender equal. As such, this Research Topic in *Frontiers in Psychology* addresses the underrepresentation of women in engineering and computing as a complex but solvable problem. This Research Topic seeks to inform the global community about advances in understanding the underrepresentation of women in engineering and computing with a focus on what enables change. Renninger, Martina Nieswandt, Suzanne Hidi, 2015-04-19 *Interest in Mathematics and Science Learning* edited by K Ann Renninger, Martin Nieswandt, and Suzanne Hidi is the first volume to assemble findings on the role of interest in mathematics and science learning. As the contributors illuminate across the volume's 22 chapters, interest provides a critical bridge between cognition and affect in learning and development. This volume will be useful to educators, researchers, and policy makers, especially those whose focus is mathematics, science, and technology education. Resources in Education, 1990

The Breeder's Gazette, 1891 **The Routledge Handbook of Religion, Politics and Ideology** Jeffrey Haynes, 2021-08-14 This comprehensive handbook examines relationships between religion, politics, and ideology with a focus on several world religions: Christianity, Islam, Buddhism, Hinduism, and Judaism in a variety of contexts, regions, and countries. Relationships between religion, politics, and ideology help mould people's attitudes about the way that political systems both domestically and internationally are organised and operate. While conceptually separate, religion, politics, and ideology often become intertwined, and as a result, their relationships evolve over time. This volume brings together a number of expert contributors who explore a wide range of topical and controversial issues, including gender, nationalism, communism, fascism, populism, and Islamism. Such topics inform the overall aim of the handbook to provide a comprehensive summary of the relationships between religion, politics, and ideology, including basic issues and new approaches. This handbook is a major research resource for students, researchers, and professionals from various disciplinary backgrounds, including religious studies, political science, international relations, and sociology. **Country Life**, 1959 *Physical Sciences : Questions with Complete Answers for Grade 10* Faan Jordaan, Retha Jordaan, Marike De Beer, 2011 Physical Science Hugh Mac Rae, Kedir Ibrahim, Malcolm James, 1977 Physical Science (grade 10), 2011 *Physical Science Workbook*, 1995 *Study and Master Physical Science Grade 10 Learner's Book* Karin H.
