FULL MEMORANDUM GRADE 12 PHYSICS 2022 FINAL

This question paper consists of 18 pages and 3 data sheets.

(QUESTION 6 (Start on a new page.)

A 12 kg block is initially at rest at point A at the bottom of a ROUGH inclined plane. The block is pulled up the incline by a constant force F acting parallel to the incline. The block reaches point B, which is at a vertical height of 4.0 m above the horizontal, with a speed of 2.0 m/s. See the diagram below.

- 6.1 Define the term non-conservative force.
- 6.2 Draw a labelled free-body diagram for the block when it is pulled up the incline plane.
- 6.3 Calculate the total work done on the block by the NON-CONSERVATIVE forces when the block moves from point A to point B. (4)

The same constant force F now moves the block at a CONSTANT VELOCITY across a rough horizontal surface from point B to point C, as shown below. Force F acts parallel to the horizontal surface.

The magnitude of the constant frictional force acting on the block while moving from point B to point C is 40 N, 40% greater than the magnitude of the constant frictional force acting on the block when it moves from point A to point B.

- 6.4 Calculate the distance from point A to point B. (5)

Time And Science - Volume 3: Physical Sciences And Cosmology Remy Lestienne, Paul Harris, 2023-06-22 The present volume of Time and Science series is devoted to Physical Sciences and Cosmology Today more than ever the question is Time an ontological property a necessary ingredient for the physical description of the world or a purely epistemological element relative to our situation in the world worry physicists and cosmologists alike For many of them Relativity and particularly General Relativity as well as its reconciliation with quantum mechanics in the elaboration of a quantum theory of gravitation points to a negative answer to the first alternative and leads them to deny the objective reality of time For others the answer is nuanced by the evidence of an emerging temporal property when one climbs the scales of the complexity of systems and or the applicability of the statistical laws of thermodynamics But for some the illusion of the unreality of time comes from certain confusions that they denounce and plead for the re establishment of time at the heart of physical theories
