**Medical Data Privacy Handbook** Aris Gkoulalas-Divanis, Grigorios Loukides, 2015-11-26 This handbook covers Electronic Medical Record EMR systems which enable the storage management and sharing of massive amounts of demographic diagnosis medication and genomic information It presents privacy preserving methods for medical data ranging from laboratory test results to doctors comments The reuse of EMR data can greatly benefit medical science and practice but must be performed in a privacy preserving way according to data sharing policies and regulations Written by world renowned leaders in this field each chapter offers a survey of a research direction or a solution to problems in established and emerging research areas The authors explore scenarios and techniques for facilitating the anonymization of different types of medical data as well as various data mining tasks Other chapters present methods for emerging data privacy applications and medical text de identification including detailed surveys of deployed systems A part of the book is devoted to legislative and policy issues reporting on the US and EU privacy legislation and the cost of privacy breaches in the healthcare domain This reference is intended for professionals researchers and advanced level students interested in safeguarding medical data

*Marine Protected Areas Network in the South China Sea* Vu Hai Dang, 2014-01-09 The once pristine and rich marine environment of the South China Sea is degrading at an alarming rate due to the rapid socioeconomic development of the region Despite this and due mainly to complicated sovereignty and maritime disputes coastal States have not been able to develop effective regional cooperation to safeguard the shared marine environment Marine Protected Areas Network in the South China Sea discusses legal and political measures to support the development of a network of marine protected areas in the South China Sea Such a network if properly developed would not only help to protect the marine environment and resources of the region but also contribute to decreasing the tension among its coastal States These measures are suggested in accordance with international law based on the specific geopolitical context of the South China Sea region and take into consideration experiences in developing regional networks of marine protected areas from other marine regions

**Nordic Perspectives on the Responsible Development of the Arctic: Pathways to Action** Douglas C. Nord, 2020-10-30 This book investigates the multifaceted nature of change in today's Nordic Arctic and the necessary research and policy development required to address the challenges and opportunities currently faced by this region It focuses its attention on the recent efforts of the Nordic community to create specialized Centers of Excellence in Arctic Research in order to facilitate this process of scientific inquiry and policy articulation The volume seeks to describe both the steps that lead to this decision and the manner in which this undertaking has evolved The work highlights the research efforts of the four Centers and their investigations of a variety of issues including those related to ecosystem and wildlife management the revitalization resource dependent communities the emergence of new climate born diseases and the development of adequate modeling techniques to assist northern communities in their efforts at adaptation and resilience

building Major discoveries and insights arising from these and other efforts are detailed and possible policy implications considered The book also focuses attention on the challenges of creating and supporting multidisciplinary teams of researchers to investigate such concerns and the methods and means for facilitating their collaboration and the integration of their findings to form new and useful perspectives on the nature of change in the contemporary Arctic It also provides helpful consideration and examples of how local and indigenous communities can be engaged in the co production of knowledge regarding the region The volume discusses how such research findings can be best communicated and shared between scientists policymakers and northern residents It considers the challenges of building common concern not just among different research disciplines but also between bureaucracies and the public Only when this bridge building effort is undertaken can true pathways to action be established

### **100 technical questions and answers for job interview**
