McKeon,2018-05-12 Well before the current age of discourse deconstruction and multiculturalism Richard McKeon propounded a philosophy of

pluralism showing how facts and values are dependent on diverse ways of reading texts This book is a transcription of an entire course including both lectures and student discussions taught by McKeon As such it provides an exciting introduction to McKeon s conception of pluralism a central aspect of neo Pragmatism while demonstrating how pluralism works in a classroom setting In his lectures McKeon outlines the entire history of Western thinking on the sciences Treating the central concepts of motion space time and cause he traces modern intellectual debates back to the ancient Greeks notably Plato Aristotle Democritus and the Sophists As he brings the story of Western science up to the twentieth century he uses his fabled semantic schema reproduced here for the first time to uncover new ideas and observations about cosmology mechanics dynamics and other aspects of physical science Illustrating the broad historical sweep of the lectures are a series of discussions which give detail to the course s intellectual framework These discussions of Plato Aristotle Galileo Newton and Maxwell are perhaps the first published rendition of a philosopher in literal dialogue with his students Led by McKeon s pointed questioning the discussions reveal the difficulties and possibilities of learning to engage in serious intellectual communication
