more ecologically responsible choices in land restoration and biodiversity conservation that address the root of the invasion phenomenon The choices we make on a daily basis the ways we procure food shelter water medicine and transportation are the major drivers of contemporary changes in ecosystem structure and function therefore deep and long lasting ecological restoration outcomes will come not just from eliminating invasive species but through conscientious redesign of these production systems Beyond the War on Invasive Species is a devastating expos of the military industrial invasive species complex and a sorely needed and impeccably researched volume that should become one of many as we recover from self destructive attempts to eradicate parts of nature instead of acting with an understanding of the whole Ben Falk author of The Resilient Farm and Homestead and founder of Whole Systems Design      **The Chemical News : and Journal of Physical Science** ,1907      *Educational Times* ,1888      **Oxford University Gazette** University of Oxford,1877      **the educational times** ,1882      Journal of Scientific and Industrial Research ,1955      *Physiology in the American Context, 1850-1940* Gerald L.
