Interdisciplinary Teaching About Earth and the Environment for a Sustainable Future David C. Gosselin, Anne E. Egger, J. John Taber, 2018-12-13 Interdisciplinary Teaching about the Earth and Environment for a Sustainable Future presents the outcomes of the InTeGrate project a community effort funded by the National Science Foundation to improve Earth literacy and build a workforce prepared to tackle environmental and resource issues The InTeGrate community is built around the shared goal of supporting interdisciplinary learning about Earth across the undergraduate curriculum focusing on the grand challenges facing society and the important role that the geosciences play in addressing these grand challenges The chapters in this book explicitly illustrate the intimate relationship between geoscience and sustainability that is often opaque to students The authors of these chapters are faculty members administrators program directors and researchers from institutions across the country who have collectively envisioned implemented and evaluated effective change in their classrooms programs institutions and beyond This book provides guidance to anyone interested in implementing change on scales ranging from a single course to an entire program by infusing sustainability across the curriculum broadening access to Earth and environmental sciences and assessing the impacts of those changes Physical and Biological Hazards of the Workplace Gregg M. Stave, Peter H. Wald, 2016-11-30 Completely updated version this classic reference covers both physical hazards and biological agents Provides updated information on protecting workers from proven and possible health risks from manual material handling extremes of temperature and pressure ionizing and non ionizing magnetic fields radiation shiftwork and more Details major changes in our understanding of biological hazards including Ebola Chikungunya Zika HIV Hepatitis C Lyme disease MERS CoV TB and much more All infectious diseases have been updated from an occupational health perspective Includes practical guidance on how to set up medical surveillance for hazards and suggests preventive measures that can be used to reduce occupational diseases *Science Teaching in Schools* Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14-19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics Concerns are also raised

about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools

international and historical approach to dietary change and health contrasting current concerns with how issues such as diabetes cancer vitamins sugar and fat and food allergies were perceived in the 19th and 20th centuries Though what we eat and what we shouldn't eat has become a topic of increased scrutiny in the current century the link between dietary innovation and health disease is not a new one From new fads in foodstuffs through developments in manufacturing and production processes to the inclusion of additives and evolving agricultural practices changing diet changes often promised better health only to become associated with the opposite With contributors including Peter Scholliers Francesco Buscemi Clare Gordon Bettencourt and Kirsten Gardner this collection comprises the best scholarship on how we have perceived diet to affect health The chapters consider the politics and economics of dietary change the historical actors involved in dietary innovation and the responses to it the extent that our dietary health itself a cultural construct or even a product of history This is a fascinating and varied study of how our diets have been shaped and influenced by perceptions of health and will be of great value to students of history food history nutrition science politics and sociology

The Closing of the Liberal Mind Kim R. Holmes, 2017-12-12 A former U S Assistant Secretary of State and currently Acting Senior Vice President for Research at The Heritage Foundation Kim R Holmes surveys the state of liberalism in America today and finds that it is becoming its opposite illiberalism abandoning the precepts of open mindedness and respect for individual rights liberties and the rule of law upon which the country was founded and becoming instead an intolerant rigidly dogmatic ideology that abhors dissent and stifles free speech Tracing the new illiberalism historically to the radical Enlightenment a movement that rejected the classic liberal ideas of the moderate Enlightenment that were prominent in the American Founding Holmes argues that today's liberalism has forsaken its American roots incorporating instead the authoritarian anti clerical and anti capitalist prejudices of the radical and largely European Left The result is a closing of the American liberal mind Where once freedom of speech and expression were sacrosanct today liberalism employs speech codes trigger warnings boycotts and shaming rituals to stifle freedom of thought expression and action It is no longer appropriate to call it liberalism at all but illiberalism a set of ideas in politics government and popular culture that increasingly reflects authoritarian and even anti democratic values and which is devising new strategies of exclusiveness to eliminate certain ideas and people from the political process Although illiberalism has always been a temptation for American liberals lurking in the radical fringes of the Left it is today the dominant ideology of progressive liberal circles This makes it a new danger not only to the once venerable tradition of liberalism but to the American nation itself which needs a viable liberal tradition that pursues social and economic equality while respecting individual liberties

Salvaging Empire James J. A. Blair, 2023-08-15 Salvaging Empire probes the historical roots and current predicaments of a twenty first century settler colony seeking to control an uncertain future through resource management and environmental science Four decades after a violent 1982 war between the United Kingdom and Argentina reestablished British authority over the Falkland Islands Las Malvinas in Spanish a commercial

fishing boom and offshore oil discoveries have intensified the sovereignty dispute over the South Atlantic archipelago. Scholarly literature on the South Atlantic focuses primarily on military history of the 1982 conflict. However, contested claims over natural resources have now made this disputed territory a critical site for examining the wider relationship between imperial sovereignty and environmental governance. James J. A. Blair argues that by claiming self-determination and consenting to British sovereignty, the Falkland Islanders have crafted a settler colonial protectorate to extract resources and extend empire in the South Atlantic. Responding to current debates in environmental anthropology, critical geography, Atlantic history, political ecology, and science and technology studies, Blair describes how settlers have asserted indigeneity in dynamic relation with the environment. *Salvaging Empire* uncovers the South Atlantic's outsized importance for understanding the broader implications of resource management and environmental science for the geopolitics of empire.

Hyperbolic Partial Differential Equations Matthew Witten, 2014-05-23 *Hyperbolic Partial Differential Equations III* is a refereed journal issue that explores the applications, theory, and/or applied methods related to hyperbolic partial differential equations or problems arising out of hyperbolic partial differential equations in any area of research. This journal issue is interested in all types of articles in terms of review, mini-monograph, standard study, or short communication. Some studies presented in this journal include discretization of ideal fluid dynamics in the Eulerian representation, a Riemann problem in gas dynamics with bifurcation, periodic McKendrick equations for age-structured population growth, and logistic models of structured population growth. A number of book reviews are also included. This journal provides an interdisciplinary forum for the presentation of results not included in other particular journals and thus will be beneficial to those interested in this field of study.

Constructing China Mobo Gao, 2018-07-20 From fear and anxiety to celebration, China's rise has provoked a variety of responses across the world. In light of this phenomenon, how are our understandings of China produced? From West to East, Mobo Gao interrogates knowledge production, rejecting the supposed objectivity of empirical statistics and challenging the assumption of a dichotomy between the Western liberal democracy and Chinese authoritarianism. By examining issues such as the Chinese Neo-Enlightenment and neoliberalism, national interest vested in Western scholarship, representations of the Great Leap Forward and the Cultural Revolution, and the South China Sea, the book asks how contemporary China is constructed. By dissecting the political agenda and conceptual framework of commentators on China, Gao provocatively urges those not only on the Right but also on the Left to be self-critical of their views on Chinese politics, economics, and history.

Turf War Steven Robinson, 2024-09-25 In the late 1980s, a band of New York civic groups set out to stop Donald Trump from building his masterpiece: a half-mile of gargantuan buildings overlooking the Hudson River on Manhattan's West Side. After five years of community organizing and strategic opposition, they defeated his proposal. The victorious civic groups had a radically different vision for the site: one that was suited to the community, environmentally sound, and financially feasible. Seeking a way forward, Trump quickly endorsed their concept. The civic groups then worked with him to finalize the design.

The resulting Riverside South Master Plan achieved substantial public benefits on privately owned land Within eighteen months of the city s approval Trump sold the property As told by one of the key participants in this conflict Turf War goes beyond the national headlines to reveal the personalities politics and economics that altered the development of this major waterfront property These Manhattan activists were attached to their turf and were willing to fight for it Cities and towns across America are facing similar assaults by developers who have little regard for the impact of their ambitions on the character of communities There are lessons to be learned here Sport and Protest in the Black Atlantic Michael J. Gennaro, Brian M. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have captivated audiences this year. Physical Sciences Memo Of 2014 June Grade1 : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
