Name:

Block:

You will have a choice of two rides. Copy the two choices below and circle the selected ride.

Create a set of physics questions related to the ride (five questions minimum).

Your set of questions must touch on at least **three** of the following topics:

- Kinematics
- Dynamics
- Equilibrium
- Momentum
- Energy
- Circular Motion
- Electrostatics
- Circuits

Provide a solution to each of your questions. Along with the calculations, a complete explanation (i.e. in words) must be provided for each solution. Diagrams should be included when appropriate.

Your solution must use measurements made at Playland. Measurements should be shown on diagrams when appropriate. Below is a list of suggested measurements that you may wish to take. The measurements you choose to take will depend on the ride. You are not limited to this list of measurements.

- height of hill
- length of track
- radius of rotation
- angle of swing
- period/frequency of rotation

Parameters required for your solution which cannot be measured can be given estimated values (e.g. mass of cart with riders). Estimated parameters must be indicated accordingly.
