Directions: As you read the chapter, answer the following questions. Later, you can use this guide to review the information in the chapter.

Lesson 1

1. What are the four categories in which medicines are classified?

Those that help prevent disease, those that fight pathogens, those that relieve pain, those that help maintain or restore health and regulate the body's systems. (Pg. 586)

2. Identify and describe three kinds of side effects that medicines can have on people.

Any three: Additive interaction happens when medicines work together in a positive way; a synergistic effect occurs when the interaction of two or more medicines results in a greater effect than when the medicines are taken alone; an antagonistic effect happens when the effect of one medicine is canceled or reduced when taken with another medicine; tolerance happens when the body becomes used to the effect of a medicine; withdrawal happens when a person stops using a medicine that he or she has a physiological dependence on. (Pg. 589)

3. What is the difference between prescription medicines and over-the-counter medicines?

Prescription medicines are available only with a doctor's written instructions and can be distributed only by a licensed pharmacist; over-the-counter medicines can be bought without a prescription and can be used without medical supervision. (Pg. 590)

Lesson 2

4. Define *substance abuse*.

Substance abuse is any unnecessary or improper use of chemical substances for nonmedical purposes. (Pg. 592)

5. What are three physical and three mental consequences of substance abuse?

Any three physical consequences: overdosing; physiological dependence; tolerance; diseases such as hepatitis B and HIV; harm to the brain, heart, lungs, and other organs. Mental consequences: clouded reasoning and thinking; lost sight of beliefs, values, and ideals; psychological dependence. (Pg. 594)
