Review of climate change science, knowledge and impacts on water resources in South Asia Lacombe, Guillaume, Chinnasamy, Pennan, Nicol, Alan, 2019-05-14 **Planning and Design for Sustainable Urban Mobility** Un-Habitat, 2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world s leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change Large Rivers Avijit Gupta, 2022-05-02 An updated treatment of management and geomorphology of large rivers around the world The newly revised Second Edition of Large Rivers Geomorphology and Management delivers a thoroughly updated exploration of the form and function of major rivers The book brings together a set of papers on the large rivers of the world offering readers an insightful examination of a demanding subject The new Second Edition of the book includes fully updated and revised chapters as well as two entirely new chapters on the Ayeyarwady and the Arctic rivers This fascinating volume describes the environmental requirements for creating and maintaining a major river system case studies on over a dozen large rivers from different continents in a variety of physical environments and the measurement and management of large rivers Unmatched in scope Large Rivers sheds light on a subject lacking in comprehensive study Readers will benefit from the inclusion of A thorough introduction to the geology of large river systems hydrology and discharge transcontinental moving and storage of sediment and the greatest floods and

largest rivers An exploration of the classification architecture and evolution of large river deltas Discussions of sedimentology and stratigraphy of large river deposits including their recognition in the ancient record and the distinction from incised valley fills An examination of the effects of tectonism climate change and sea level change on the form and behavior of the modern Amazon river and its floodplain Measurement and management of large rivers The effect of climatic change on large rivers Perfect for postgraduate students and researchers in fluvial geomorphology hydrology sedimentary geology and river management Large Rivers Geomorphology and Management will also earn a place in the libraries of engineers and environmental consultants in the private and public sectors working on major rivers around the world

Shifting Mobility Dewan Masud Karim, 2025-03-13 Embark on a journey into the heart of a new industrial revolution one that promises to redefine human mobility for generations to come In this groundbreaking exploration we confront the promises and perils of new mobility navigating the intricate landscape where technology intersects with urban society As cities evolve and technology shapes our daily lives the ethical dimensions of this transformation remain largely uncharted territory Amidst the rapid advancement of new mobility systems this book sheds light on the moral dilemmas and philosophical underpinnings that often go unnoticed From the ethical implications of technology to the systemic flaws in planning and design we delve into the core of this paradigm shift By understanding the foundational principles of mobility and the hidden codes that govern human movement we pave the way for a more equitable and inclusive future At the heart of this transformative vision lies a comprehensive framework for building a new mobility ecosystem one that prioritizes human well being and equity above all else Through innovative planning processes and redesign concepts we aim to bridge the gap between technology and society ensuring that every individual has access to safe efficient and sustainable modes of transportation From low emission vehicles to multimodal transit hubs this book presents a blueprint for reimagining urban spaces and redefining the way we move By embracing shared values and collective responsibility we strive to create a world where mobility is not just a privilege but a fundamental human right As we embark on this journey towards a more sustainable future let us remember that the true measure of progress lies not in technological innovation alone but in our ability to build communities that thrive together Join us in shaping the future of mobility one where humanity and equity reign supreme
