Fundamentals of Hernia Radiology Salvatore Docimo Jr., Jeffrey A. Blatnik, Eric M. Pauli, 2023-03-16

This book offers a complete focus on the radiographic analysis of the abdominal wall and hernias. An estimated 20 million hernias are repaired annually throughout the world. As the technology utilized to complete hernia repairs becomes more complex, surgeons are required to have a more thorough understanding of the radiographic anatomy and diagnostic modalities used to evaluate hernias. Furthermore, the amount that now goes into the preoperative planning of hernias for complex repairs, such as robotic and open transversus abdominis muscle release procedures, requires an understanding of radiology and the ability to identify nuances of anatomy offered by the imaging. The use of mesh and extent of redo hernia repairs has also complicated radiographic evaluation of hernias. The text is a comprehensive review of abdominal wall imaging broken down into individual types of hernia. Each hernia type is discussed with consideration to the best type of imaging, evaluation, unique radiographic findings, and considerations prior to repair. Representative images, diagrams, and videos are used to point out anatomy and features of the hernia. This text offers the first of its kind, standardized approach to evaluating hernias radiographically. Most importantly, each hernia chapter is approached with the surgeon in mind, meaning authors explain the radiology based on anatomy and with a plan for surgical repair on the horizon. Select chapters include illuminating videos to give context to the text. This is an ideal guide for practicing surgeons and trainees treating patients with hernias.

Entity-relationship Approach Salvatore T. March, 1988. The Entity Relationship Approach is the basis for many database design and system development methodologies. The sixth international conference was organized to bring together researchers and practitioners to share new developments and discuss issues related to the use of the ER approach. Three major themes are addressed in this book: database development and management, application systems management, and organizational information resources. Abstracts from the keynote addresses, tutorials, vendor presentations, and panel sessions are included along with 25 complete papers. Both theory and practice are addressed.

Fundraising for Small Museums Salvatore G. Cilella Jr., 2011-05-16. This clear, accessible manual is designed specifically for people running the thousands of small museums, historic houses, and historic sites across the U.S. and Canada. Typically, these smaller institutions lack endowments and are underfunded. They also tend to be understaffed so that their administrators wear many hats: curator, researcher, building manager, accountant, and fundraiser, to name a few. This guide will help small museum administrators perform their jobs more efficiently by teaching them how to secure funding for their programs and institutions.
