SPRING BREAK PACKET

Reading Comprehension

Dinosaur

Dinosaur fossils are very rare. Dinosaurians that lived long ago.

People who look for the bones of dinosaurs. They dig for their find bones, they are called paleontologists.

Fossils tell us about the dinosaurs that lived and what they ate.

We can use fossils to learn about the dinosaurs that lived long ago.

What are paleontologists?

Where can we find fossils?

The Little Caterpillar

Max found a caterpillar in the garden. He named it Benny. Max made a home for Benny in a jar with holes.

Every day, Max gave Benny leaves. But Benny stopped eating. Max was worried. Why wasn't Benny hungry?

Dad said, "Benny is changing." They watched Benny make a chrysalis. It was like a tiny sleeping bag.

Max waited. He looked at the chrysalis every day. One morning, the chrysalis was open. Benny was not there anymore. Instead, there was a butterfly! Its wings were yellow and black. Max was amazed. Benny had changed!

Max let the butterfly go. It flew into the sunny sky. Max felt happy. He had helped Benny grow up.

How does Max feel when Benny stops eating?

What happens when the chrysalis?

Northwestern Miller ,1882 **Self-regulation of Learning and Performance** Dale H. Schunk, Barry J.
Zimmerman, 2023-01-06 In recent years educators have become increasingly concerned with students attempts to manage
their own learning and achievement efforts through activities that influence the instigation direction and persistence of those
efforts In 1989 Zimmerman and Schunk edited the first book devoted to this topic They assembled key theorists offering a
range of perspectives on how students self regulate their academic functioning One purpose of that volume was to provide
theoretical direction to ongoing as well as nascent efforts to explore academic self regulatory processes Since that date there
has been an exponential surge in research This second volume on academic self regulation offers the fruits of the first
generation of research It also addresses a number of key issues that have arisen since then such as how self regulation
differs from such related constructs as motivation and metacognition and whether students can be taught self regulatory
skills The contributors reveal an interesting uplifting and at times disturbing picture of how students grapple with the day to
day problems of achieving in circumstances with inherent limitations and obstacles This volume provides insight into the
source of students capabilities to surmount adversities the origins of their self initiated processes designed to improve
learning motivation and achievement The text is organized on the basis of a conceptual framework that analyzes academic
self regulation into four major dimensions That model is presented in the first chapter and key processes that influence each
of these dimensions are discussed by prominent researchers in the chapters that follow Because each chapter is written to
follow a common format this work provides a level of continuity and parsimony normally found only in authored textbooks
Peterson's Guide to Graduate and Professional Programs, an Overview ,1990 **The New York Mirror** Theodore
