Methods and Techniques for Preventing and Mitigating Water Hazards in Mines Shuning Dong, Wanfang Zhou, Qisheng Liu, Hao Wang, Yadong Ji, 2021-01-23 This book summarizes the advances in mine hydrogeology in terms of the development of new technologies and sustainable mining to prevent water inrush disasters during coal mine construction and production in China. It presents holistic topics that balance safe coal mining and the minimization of impacts on the environment and human beings. Systematically describing the methods and techniques used in China's coal mines to predict, prevent, and mitigate water inrushes, it includes nine case studies to illustrate the practical engineering solutions using state-of-the-art methods and technologies under various conditions. It also discusses how the approaches could help solve the world's water problems not only in mining but also in tunneling, disposing of nuclear waste, storing natural gas, and sequestering CO₂ as well as their impact on mining industries and related fields around the world. The book is intended for students, researchers, and practitioners working in the mining industries.
