

STRUCTURE OF A BIOLOGY RESEARCH PAPER

1. TITLE

The title of your paper should be an opening statement or question based on the topic of the paper.

2. ABSTRACT

An abstract is a short summary from start to finish of what the paper includes. When writing your abstract, remember the objective. The reader should be able to know exactly what the research paper is about and the results presented.

3. INTRODUCTION

The introduction is self-explanatory, it is the opening discussion where the author can present what the paper is about and what it will try to achieve.

4. METHODS

The methods section explains how tests are carried out so another scientist can copy the procedure. This will be through one of the methods discussed above.

5. RESULTS

This is the section where the results obtained from the method are presented, this can be observational or figure-based.

6. DISCUSSION

This is where the author will discuss results and anything that affected them. This is also where the author will discuss their opinions on the results and if they expected them based on external literature.

7. LITERATURE CITED

Finally, there will be a reference section relating to citations inserted in the text.

Assessing Writing, Assessing Learning Dudley W. Reynolds, 2010-06-07 The goals of this

resource are broader than many standard books on writing assessment which focus on evaluating an individual's ability to create an effective piece of writing for a particular purpose. *Assessing Writing* seeks to support teachers, administrators, program directors and funding entities who want to make the best use of the resources at their disposal to understand what students are learning and why and then take actions based on what they have learned. It also seeks to provide a common basis for communication among all the interested parties: the writing professionals, the people who identified the need for the program and the students. The book has sections on planning tools, different ways of collecting data and links to instruments and reporting examples provided. Each section includes a discussion of issues and advice for working through the issue along with numerous examples plus a list of resources to consult to learn more. The final chapter provides worksheets that may be reproduced and used to help those in charge of setting up and delivering a writing program to think through the issues presented. A glossary of terms is also included. Scholarly Writing Mary Renck Jalongo, Olivia N.

Saracho, 2023-11-20. This book on scholarly writing offers a unique evidence-based, technology-supported approach to writing for publication across the disciplines. It is suitable both as a graduate-level textbook and as support for faculty seeking professional development in scholarly writing. It is a sequel to *Writing for Publication: Transitions and Tools That Support Scholars' Success*. Current issues in Academia such as the expectation that graduate students will publish the option for doctoral students to publish in lieu of writing the dissertation, the pressure on scholars from various countries to contribute to professional journals written in English and the metrics used to assess impact of published work have influenced scholarly writing. Unlike other books on the topic, every chapter includes narratives of experience, self-assessment tools, guided practice activities, reviews of research and discussion of controversies in publishing. All chapters incorporate curated online resources and technology supports as well. Across the spectrum of experience ranging from aspiring author to prolific readers are guided in ways to generate manuscripts that are not only readable and publishable but also downloaded and respectfully cited by their professional peers. **Perspectives on the Introductory Phase of Empirical Research Articles** (Kathy)

Ling Lin, 2019-10-22. Combining English for Specific Purposes (ESP), genre-based analysis, corpus-based language studies and semi-structured interviews, this book represents the first multi-faceted project on the macro structure of empirical research articles (ERAs) from both synchronic and diachronic perspectives and on the I-L-R patterned introductory phase comprising two introductory sections, i.e. the Introduction and the Literature Review, in RAs drawn from civil engineering and applied linguistics journals regarding their rhetorical organization, use of citation and structural and functional links and variations. The project comprises three logically interconnected studies using a multi-perspective, the cross-disciplinary, cross-generic, emic and published advice vs. actual expert practices perspectives approach. It will make a significant contribution to our understanding of the genre, evolution, rhetorical organization and citation features of ERAs, enrich English for Academic Purposes (EAP) theories and facilitate the development of EAP pedagogy and materials.
