

Word Equations

Write the skeleton equations for each of the following chemical reactions and then balance them:

1) When dissolved beryllium chloride reacts with dissolved silver nitrate in water, aqueous beryllium nitrate and silver chloride powder are made.

2) When isopropanol ($\text{C}_3\text{H}_8\text{O}$) burns in oxygen, carbon dioxide, water, and heat are produced.

3) When dissolved sodium hydroxide reacts with sulfuric acid, aqueous sodium sulfate, water, and heat are formed.

4) When fluorine gas is put into contact with calcium metal at high temperatures, calcium fluoride powder is created in an exothermic reaction.

5) When sodium metal reacts with iron (II) chloride, iron metal and sodium chloride are formed.

Chemistry 'O' Level Rex M. Heyworth, 2007 Chemistry insights 'O' level Rex M. Heyworth, 2007 **Chemistry in Quantitative Language** Christopher O. Oriakhi, 2021

Chemistry in Quantitative Language is an invaluable guide to solving chemical equations and calculations. It provides readers with intuitive and systematic strategies to carry out the many kinds of calculations they will meet in general chemistry. This book provides innovative intuitive and systematic strategies to tackle any type of calculations encountered in chemistry. Each chapter introduces the basic theories and concepts of a particular topic focusing on relevant equations. Worked examples illuminate each type of problem with carefully explained step by step solutions. Since chemistry problem can be presented in a number of ways the examples include several versions of each questions. To help students understand and retain the procedures the solutions discuss not only what steps to carry out to reach solutions but why. The second edition contains additional problems at the end of each chapter with varying degrees of difficulty and many of the original examples have been revised. Book jacket

Chemistry Made Clear R. Gallagher, P. Ingram, 1987

Chemistry Made Clear is widely used as a core GCSE Chemistry text or as the Chemistry component of a balanced science course. Students will be able to find things out quickly and easily among the simplified explanations. Each double page spread deals with a different topic and includes questions. Exam level questions at the end of each chapter. Line drawings and photographs highlight the real life applications of chemistry.

Writing Chemistry Patents and Intellectual Property Francis J. Waller, 2011-07-07

Understanding intellectual property safeguarding your ideas. Intellectual property is constantly at risk and the protection of chemical science and technology through the patenting process allows individuals and companies to protect their hard work. But in order to truly be able to protect your ideas you need to understand the basics of patenting for yourself. A practical handbook designed to empower inventors like you to write your own patent application drafts in conjunction with an attorney. *Writing Chemistry Patents and Intellectual Property: A Practical Guide* presents a brand new methodology for success. Based on a short course author Francis J Waller gives for the American Chemical Society the book teaches you how to structure a literature search to educate the patent examiner on your work to prepare an application that can be easily duplicated and to understand what goes on behind the scenes during the patent examiner's rejection process. Providing essential insights invaluable strategies and applicable real world examples designed to maximize the chances that a patent will be accepted by the United States Patent and Trademark Office. *Writing Chemistry Patents and Intellectual Property* is the book you need if you want to keep your work protected.

Basic Concepts of Chemistry Leo J. Malone, Theodore Dolter, 2008-12-03

Engineers who need to have a better understanding of chemistry will benefit from this accessible book. It places a stronger emphasis on outcomes assessment which is the driving force for many of the new features. Each section focuses on the development and assessment of one or two specific objectives. Within each section a specific objective is included an anticipatory set to orient the reader content discussion from established authors and guided

practice problems for relevant objectives These features are followed by a set of independent practice problems The expanded Making it Real feature showcases topics of current interest relating to the subject at hand such as chemical forensics and more medical related topics Numerous worked examples in the text now include Analysis and Synthesis sections which allow engineers to explore concepts in greater depth and discuss outside relevance
