

Sample Reflective Essay

Author: Nekisa Mahzad

I have been a student at California State University Channel Islands (CI) for 5 semesters, and over the course of my stay I have grown and learned more than I thought possible. I came to this school from Moorpark Community College already knowing that I wanted to be an English teacher; I had taken numerous English courses and though I knew exactly what I was headed for-was I ever wrong. Going through the English program has taught me so much more than stuff about literature and language, it has taught me how to be me. I have learned here how to write and express myself, how to think for myself, and how to find the answers to the things that I don't know. Most importantly I have learned how important literature and language are.

When I started at CI, I thought I was going to spend the next 3 years reading classics, discussing them and then writing about them. That was what I did in community college English courses, so I didn't think it would be much different here. On the surface, to an outsider, I am sure that this is what it appears that C.I. English majors do. In most all my classes I did read, discuss, and write papers; however, I quickly found out that that there was so much more to it. One specific experience I had while at C.I. really shows how integrated this learning is. Instead of writing a paper for my final project in Perspectives of Multicultural Literature (ENGL 449), I decided with a friend to venture to an Indian reservation and compare it to a book we read by Sherman Alexie. We had a great time and we learned so much more that we ever could have done from writing a paper. The opportunity to do that showed me that there are so many ways that one can learn that are both fun and educational.

The English courses also taught me how powerful the written word and language can be. Words tell so much more than a story. Stories tell about life and the human condition, they bring up the past and people and cultures that are long gone. Literature teaches about the self and the world surrounding the self. From these classes I learned about the world, its people and its history; through literature I learned how we as humans are all related. By writing about what we learn and/or what we believe, we are learning how to express ourselves.

I know that my ability to write and express my ideas, thoughts and knowledge has grown stronger each semester. I have always struggled to put my thoughts on paper in a manner that is coherent and correct according to assignments. I can remember being told numerous times in community college to "organize your

Reconstructing Response to Student Writing Dan Melzer,2023-08-07 In *Reconstructing Response to Student Writing* Dan Melzer makes the argument

that writing instructors should shift the construct so that peer response and student self assessment are more central than teacher response Presenting the results of a national study of teacher and peer response and student self assessment at institutions of higher education across the United States Melzer analyzes teacher and peer response to over 1 000 pieces of student writing as well as 128 student portfolio reflection essays He draws on his analysis and on a comprehensive review of the literature on response to introduce a constructivist heuristic for response aimed at both composition instructors and instructors across disciplines Melzer argues that teachers and researchers should focus less on teacher response to individual pieces of student writing and more on engaging in dialogue with student self assessment and peer response focusing on growth and transfer rather than products and grades Reconstructing Response to Student Writing especially when taken together with Melzer s previous book Assignments across the Curriculum provides a comprehensive and large scale view of college writing and responding across the curriculum in the United States [Teaching Science With Interactive Notebooks](#) Kellie Marcarelli,2010-05-18 Packed with student samples this resource describes how to implement interactive notebooks in the inquiry based science classroom including execution time management and grading
