The Use of Pop Songs in the EFL Classroom
Ornerová Lenka, 2011-03-09 Inhaltsangabe Introduction I have chosen the topic of using pop songs in the EFL classroom because I strongly believe that working with pop songs is a highly motivational device When I was a student at a lower and upper secondary school listening to songs in English classes was my favourite activity I have always wanted to be able to understand the lyrics of songs I listened to Later I realized that I have learned a lot from listening to pop songs and analyzing their lyrics Therefore in my diploma project I would like to prove that using pop songs is a highly motivational device in teaching English with instructional value and that students enjoy working with pop songs The theoretical part of this diploma project is based on relevant sources of background literature In the first two chapters the use of songs is described with regard to motivation and the Multiple Intelligences Theory The third and fourth chapter deal with the reasons for using songs and their classification In the last two chapters of the theoretical part pedagogical principles of using pop songs in class as well as the pros and cons of teaching through pop songs are presented The practical part is based on the findings of three surveys I have conducted in the field of using songs in the EFL classroom In the first part of the research I present an analysis of questionnaires which I distributed among English teachers at lower and upper secondary schools and grammar schools In the second part of the research I describe students attitudes to pop song based lessons which I taught during my teaching practice at grammar schools In the third part of the research I analyze the types of songs presented in commonly used textbooks at lower and upper secondary schools In addition I present a self developed teaching material containing a list of pop songs suitable for the EFL classroom In the last part of the practical part I answer the research questions and provide some implications for my own teaching Inhaltsverzeichnis Table of Contents ABBREVIATIONS AND DEFINITIONS ABSTRACT INTRODUCTION9 THEORETICAL PART 1 MOTIVATION10 1 1Definition of motivation10 1 2Different kinds of motivation11 1 3Motivation in second language acquisition learning vs foreign language learning12 1 4Sources of motivation in the EFL classroom14 2 MULTIPLE INTELLIGENCES16 2 1The categories of intelligence17 2 2The implications of MI theory for ELT19 2 3Musical

How can the use of frequency information from corpora be used in foreign

language teaching? A corpus-based study on vocabulary in course books Karin Dietiová, 2019-02-27 Diploma Thesis from the year 2016 in the subject Didactics for the subject English Pedagogy Literature Studies grade A course Angli tina language English abstract How can corpora be used to improve vocabulary learning in language acquisition This thesis focuses on the use of word frequencies by teachers of English Teaching vocabulary to young learners is one of the most challenging responsibilities that teachers face The methodology chosen for the presentation of vocabulary is crucial for the learning success of the students There is a great amount of studies on how computers can facilitate the learning of English as a foreign language EFL and with the development of immense corpora both teachers and students now have access to hundreds of millions of words and the possibility to explore their occurrence patterns This advantage is however rarely used in practice partly due to the relatively short existence of this discipline but most importantly due to the lack of information about corpora in English language teaching ELT This paper will present the concept of course book vocabulary and present word frequencies in learner s dictionaries The research part of this thesis deals with a linguistic analysis of data extracted from course books and their comparison with the Oxford list of 3000 essential words The aim of the thesis is to investigate the linguistic attributes of texts forming course books and to examine their relation Projects in the Computing Curriculum Michael Holcombe, Andrew F. Stratton, Sally A. Fincher, Gary Griffiths, 2012-12-06 Dr Peter Milton Director of Programme Review Quality Assurance Agency I am grateful to the authors for giving me the opportunity to write this foreword mainly because it represents the first occasion that the Fund for the Development of Teaching and Learning FDTL has led directly to a publication such as this In my former capacity as Director of Quality Assessment at the Higher Education Funding Council for England HEFCE I chaired the FDTL Committee during 1996 7 and am delighted to see the projects which were selected so painstakingly leading to successful outcomes Assessment of the quality of higher education HE was introduced in 1993 and was intended to improve public information about what was on offer in British universities and colleges as well as to assist in the enhancement of educational opportunities for students This was part of a larger agenda in which educational quality and the standards achieved by students have come under increasing scrutiny with a long term objective of linking funding allocations to the quality of the provision It was in this context that the FDTL Initiative was launched in 1995 to support projects aimed at stimulating developments in teaching and learning and to encourage the dissemination of good practice across the HE sector Good practice is identified through the process of quality assessment and bids for funding can only be made by those institutions which have demonstrated high quality provision To date the programme includes 63 projects drawn from 23 subject areas Design Methods and Practices for Research of Project Management Beverly Pasian, Rodney Turner, 2016-08-12 Design Methods and Practices for Research of Project Management is the most comprehensive guide on how to do research of and in project management Project management as a discipline has experienced near exponential growth in its application across the business and not for profit sectors This second edition

of the authoritative reference book offers a substantial update on the first edition with over 60% new content and so provides both practitioner and student researchers with a fully up to date and complete guide to research practice on project management In Design Methods and Practices for Research of Project Management Beverly Pasion and Rodney Turner have brought together 27 original chapters from many of the leading international thinkers in project management research The collection looks at each step in the research stages including research strategy management methodology quantitative and qualitative techniques as well as how to share and publish research findings The chapters offer an international perspective with examples from a wide range of project management applications engineering construction mega projects high risk environments and social transformation Each chapter includes tips and exercises for the research student as well as a complete set of further references The book is the go to text for practitioners undertaking research in companies and also doctoral and masters students and their supervisors who are involved in research projects in and for universities

restricted to scholarly journals and has not found a broad audience This publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to help engineers become better educators devise more effective curricula and be more effective leaders and advocates in curriculum and research development The author s first objective is to provide an illustrative review of research and development in engineering education since 1960 His second objective is with the examples given to encourage the practice of classroom assessment and research and his third objective is to promote the idea of curriculum leadership The publication is divided into four main parts Part I demonstrates how the underpinnings of education history philosophy psychology sociology determine the aims and objectives of the curriculum and the curriculum s internal structure which integrates assessment content teaching and learning Part II focuses on the curriculum itself considering such key issues as content organization trends and change A chapter on interdisciplinary and integrated study and a chapter on project and problem based models of curriculum are included Part III examines problem solving creativity and design Part IV delves into teaching assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork The book ends with a brief insightful forecast of the future of engineering education Because this is a practical tool and reference for engineers each chapter is self contained and may be read independently of the others Unlike other works in engineering education which are generally intended for educational researchers this publication is written not only for researchers in the field of engineering education but also for all engineers who teach All readers acquire a host of practical skills and knowledge in the fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum improvement and evaluation

Student's Guide to Writing Dissertations and Theses in Tourism Studies and Related Disciplines Tim Coles, David Timothy Duval, Gareth Shaw, 2013 This book intends to take the stress and anxiety out of doing a dissertation in tourism studies and related disciplines The dissertation process is examined from the germination of an idea to the submission presentation and assessment of the final document We offer a framework for conducting dissertations in the English speaking world which students can adopt to varying degrees in their research at the undergraduate and masters levels We aim to debunk the popular myths and common pitfalls of doing a dissertation Rather than view the dissertation as a single overwhelming project the dissertation is presented as a series of more modest manageable yet crucially inter linked tasks that all students can successfully complete through effective time management

The Craft of Research, Third Edition Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2009-05-15 With more than 400 000 copies now in print The Craft of Research is the unrivaled resource for researchers at every level from first year undergraduates to research reporters at corporations and government offices Seasoned researchers and educators Gregory G Colomb and Joseph M Williams present an updated third edition of their classic handbook whose first and second editions were written in collaboration with the late Wayne C Booth The Craft of Research explains how to build an argument that motivates readers to accept a claim how to anticipate the reservations of readers and to respond to them appropriately

and how to create introductions and conclusions that answer that most demanding question So what The third edition includes an expanded discussion of the essential early stages of a research task planning and drafting a paper The authors have revised and fully updated their section on electronic research emphasizing the need to distinguish between trustworthy sources such as those found in libraries and less reliable sources found with a quick Web search A chapter on warrants has also been thoroughly reviewed to make this difficult subject easier for researchers Throughout the authors have preserved the amiable tone the reliable voice and the sense of directness that have made this book indispensable for anyone undertaking a research project
