Liverpool University Press Autumn 2010 Catalogue , *Just Another Ape?* Helene Guldborg, 2013-11-12 Today the belief that human beings are special is distinctly out of fashion Almost every day we are presented with new revelations about how animals are so much more like us than we ever imagined The argument is at its most powerful when it comes to our closest living relatives the great apes This book argues that whatever first impressions might tell us apes are really not just like us Science has provided strong evidence that the boundaries between us and other species are vast Unless we hold on to the belief in our exceptional abilities we will never be able to envision or build a better future in which case we might as well be monkeys
