The Rice Report 2008:

The Rice Crisis David Dawe, 2012-07-26 The recent escalation of world food prices particularly for cereals prompted mass public indignation and demonstrations in many countries from the price of tortilla flour in Mexico to that of rice in the Philippines and pasta in Italy The crisis has important implications for future government trade and food security policies as countries re evaluate their reliance on potentially more volatile world markets to augment domestic supplies of staple foods This book examines how government policies caused and responded to soaring world prices in the particular case of rice which is the world s most important source of calories for the poor Comparable case studies of policy reactions in different countries principally across Asia but also including the USA provide the understanding necessary to evaluate the impact of trade policy on the food security of poor farmers and consumers They also provide important insights into the concerns of developing countries that are relevant for future international trade negotiations in key agricultural commodities As a result more appropriate policies can be put in place to ensure more stable food supplies in the future Published with the Food and Agriculture FAO Organization of the United Nations trade and development report, 2008 United Nations,

Interpretation of Three-Dimensional Seismic Data, Seventh Edition Alistair R. Brown, 2011-08-20 Hardcover plus DVD The Law Reports of the Special Court for Sierra Leone Charles Chernor Jalloh, Simon Meisenberg, 2016-03-11 The Special Court for Sierra Leone was established through signature of a bilateral treaty between the United Nations and the Government of Sierra Leone in early 2002 making it the third modern ad hoc international criminal tribunal The tribunal has tried various persons including former Liberian President Charles Ghankay Taylor for allegedly bearing greatest responsibility for serious violations of international humanitarian law committed during the latter half of the Sierra Leonean armed conflict It completed its work in December 2013 A new Residual Special Court for Sierra Leone based in Freetown and with offices in The Hague has been created to carry out its essential residual functions This volume which consists of three books and a CD ROM and is edited by two legal experts on the Sierra Leone court presents for the first time in a single place a comprehensive collection of all the interlocutory decisions and final trial and appeals judgments issued by the court in the case Prosecutor v Charles Ghankay Taylor The Taylor case is the jewel in the crown of the SCSL as it was the first ever trial and conviction of a former African head of state for crimes committed in a neighboring state It is also one of a handful of such significant cases in international criminal law The Taylor Law Report contains the full text of all substantive judicial decisions including the majority separate and concurring as well as dissenting opinions and probably the longest trial judgment ever issued by an international criminal court It additionally provides relevant information for a better understanding of the case such as the indictments a list of admitted exhibits and a list of documents on the case file This book set which is the third in a series of edited law reports that follows volume 1 on Prosecutor v Brima Kamara and Kanu the so called AFRC case published in November 2012 and volume 2 Prosecutor v Norman Fofana and Kondewa the CDF case

Crop-livestock Interactions and Livelihoods in the Gangetic Plains of West Bengal, India, 2007-01-01 *The Russian Military Resurgence* René De La Pedraja, 2018-11-21 The transition from the Soviet to the post 1991 Russian military is a fascinating story of decline and reinvention The Soviet army suffered a slow demise dissolving in 2000 and only gradually reforming based on radically different principles The First Chechnya War 1994 1996 was the lowest point for the Soviet military but the Second Chechnya War 1999 2004 saw the initial stirrings of the new Russian army The Five Day War with Georgia in August 2008 was its first major success and marked Russia's return to world power status Lively accounts and maps describe the actions of these wars along with the Crimea operation of 2014 the separatist struggles in eastern Ukraine and the ongoing Russian intervention in Syria *Re-Creating Nature* James T. Bradley, 2019-09-24 An exploration of the moral and ethical implications of new biotechnologies Many of the ethical issues raised by new technologies have not been widely examined discussed or indeed settled For example robotics technology challenges the notion of personhood Should a robot capable of making what humans would call ethical decisions be held responsible for those decisions and the resultant actions Should society reward and punish robots in the same way that it does humans Likewise issues of safety environmental concerns and distributive justice arise with the increasing acceptance of genetically modified organisms GMOs in food production nanotechnology in engineering and medicine and human gene therapy and enhancement The problem of dual use when a technology can be used both to benefit and to harm exists with virtually all new technologies but is central in the context of emerging 21st century technologies ranging from artificial intelligence and robotics to human

gene editing and brain computer interfacing In Re Creating Nature Science Technology and Human Values in the Twenty First Century James T Bradley addresses emerging biotechnologies with prodigious potential to benefit humankind but that are also fraught with ethical consequences Some actually possess the power to directly alter the evolution of life on earth including human Specifically these topics include stem cells synthetic biology GMOs in agriculture nanotechnology bioterrorism CRISPR gene editing technology three parent babies robotics and roboethics artificial intelligence and human brain research and neurotechnologies Offering clear explanations of these various technologies a pragmatic presentation of the conundrums involved and questions that illuminate hypothetical situations Bradley guides discussions of these and other thorny issues resulting from the development of new biotechnologies He also highlights the responsibilities of scientists to conduct research in an ethical manner and the responsibilities of nonscientists to become science literate in the twenty first century

Water Civilization Yoshinori Yasuda,2012-10-24 Water Civilization From Yangtze to Khmer Civilizations comprises three major topics 1 Discovery of the origin of rice agriculture and the Yangtze River civilization in southern China was mainly based on investigation of the Chengtoushan archaeological site the earliest urban settlement in East Asia The origin of rice cultivation can be traced back to 10000 BC with urban settlement starting at about 6000 BP 2 The Yangtze River civilization collapsed around 4200 BP Palaeoenvironmental studies including analyses of annually laminated sediments in East and Southeast Asia indicate a close relationship between climate change and the rise and fall of the rice cultivating and fishing civilization and 3 Migrations from southern China to Southeast Asia occurred after about 4200 BP Archaeological investigation of the Phum Snay site in Cambodia including analyses of DNA and human skeletal remains reveals a close relationship to southern China indicating the migration of people from southern China to Southeast Asia This publication is an important contribution to understanding the environmental history of China and Cambodia in relation to the rise and fall of the rice cultivating and fishing civilization which we call water civilization

Handbook on the History of Mathematics Education Alexander Karp, Gert Schubring, 2014-01-25 This is the first comprehensive International Handbook on the History of Mathematics Education covering a wide spectrum of epochs and civilizations countries and cultures Until now much of the research into the rich and varied history of mathematics education has remained inaccessible to the vast majority of scholars not least because it has been written in the language and for readers of an individual country And yet a historical overview however brief has become an indispensable element of nearly every dissertation and scholarly article This handbook provides for the first time a comprehensive and systematic aid for researchers around the world in finding the information they need about historical developments in mathematics education not only in their own countries but globally as well Although written primarily for mathematics educators this handbook will also be of interest to researchers of the history of education in general as well as specialists in cultural and even social history

The Genome Generation Elizabeth Finkel, 2012 The year 2001 marked more than just the beginning of Stanley Kubrick's Space Odyssey it marked the beginning of the genome era That was the year scientists first read the 3 billion letters of DNA that make up the human genome This was followed by a veritable Noah's Ark of genomes—sponges and worms dogs and cows rice and wheat chimps and

elephants and 180 creatures aboard so far So what have we learned from all this How has it changed the way we practise medicine grow crops and breed livestock What have we learned about evolution These are the questions science writer and molecular biologist Elizabeth Finkel asked herself four years ago To find the answers she travelled the science frontier from Botswana to Boston from Warracknabeal to Mexico and tracked down scientists working in the field Their stories told here paint the picture of what it means to be part of the genome generation The Genome Generation is absolutely riveting These tales from the frontier are a must read for everyone who wishes to understand our past and the logic of evolution or take a peep into our exciting future at the creation of super plants through digital agriculture
