Organizations, Markets and Imperial Formations Subhabrata Bobby Banerjee, Vanessa C. M. Chio, Raza Mir, 2009-01-01 This edited collection is an extraordinarily welcome text for those of us teaching international management in the US while observing with dismay the

lack of critical awareness about the rest of the world in extant disciplinary scholarship Rather than giving us the view from the rest the collection advances a temporal and spatial relational approach to understanding globalization and compels its audience to bridge the gap between the west and the rest by bringing to visibility the cultural and material encounters co constructing them In this context the various contributions deconstruct international management as market based activity exposing its mode of existence within complex power relations networks extending over time and space Marta B Cal s University of Massachusetts US Organizations Markets and Imperial Formations offers a set of innovative critiques of contemporary economic globalization A major theme of the book is that our imperialist histories have resulted in a globalization process that replicates exploitative colonialist patterns Chapter authors provide insights on a variety of subjects including a critique of mainstream international management textbooks and the simplistic toolkits they offer to managers an analysis of how a universalistic view of capitalism and economic organization results in exploitative patterns of resource appropriation and documentation of the negative consequences of globalization specifically patterns of inequality and class segregation Alison M Konrad University of Western Ontario Canada This authoritative book explores the nexus between organization theory globalization and imperialism and examines the effects of a global order organized around development and markets The authors explore how interconnections between organization theory and the global political economy have led to the perpetuation of inequality and active reconfigurations of life labour and the economy They contend that cultural ethnocentrism and Western ideologies of development continue to inform the field of organizational studies and offer an alternate mode of theorizing Through theoretical and empirical reflections the authors produce a patchwork quilt of innovatively critical approaches to globalization Graduate students academics and scholars in the fields of management and organizational sciences as well as postcolonial development and globalization studies will find this book of particular interest It is also an invaluable read for international management and strategy scholars including those focused on multinational operations in the Third World
