These sticking points revolve around differing attitudes toward managing one's own time, texting, social media, organizational structure, and of course clothing preferences. If we don't learn to work together and stick together around these 12 sticking points, then we'll be wasting a lot of time fighting each other instead of enjoying a friendly and productive team. *Sticking Points* is a must-read book that will help you understand the generational differences you encounter while teaching how we can learn to speak one another's language and get better results together. *Generational IQ: Why is my daughter drifting from God? Why can't I explain my life choices to my parents? When will my son get a real job?* Within the last several decades, the world has shifted dramatically. The cracks of this fundamental shift appear everywhere in our economy, in our cultural debates, in our political landscape, and most important, in our churches. The problem is we tend to overreact to these changes, fearing that Christianity is dying. We need better *Generational IQ* so we can respond to the changes but not be terrified by them. We need a wise generational coach. Haydn Shaw is that generational expert showing us the roots of this generational shift and how it affects every one of us. Each generation, whether it's the aging Boomers or the young Millennials, approaches God with a different set of questions and needs based on the times in which they grew up. Haydn walks you through these generational differences and paints a vision of hope for the future. *One Mind and All of Time* Gregory Miller, 2017-03-06

**In Schools We Trust** Deborah Meier, 2014-02-18 We are in an era of radical distrust of public education Increasingly we turn to standardized tests and standardized curricula now adopted by all fifty states as our national surrogates for trust Legendary school founder and reformer Deborah Meier believes fiercely that schools have to win our faith by showing they can do their job But she argues just as fiercely that standardized testing is precisely the wrong way to that end The tests themselves she argues cannot give the results they claim And in the meantime they undermine the kind of education we actually want In this multilayered exploration of trust and schools Meier critiques the ideology of testing and puts forward a different vision forged in the success stories of small public schools she and her colleagues have created in Boston and New York These nationally acclaimed schools are built famously around trusting teachers and students and parents to use their own judgment Meier traces the enormous educational value of trust the crucial and complicated trust between parents and teachers how teachers need to become better judges of each others work how race and class complicate trust at all levels and how we can begin to scale up from the kinds of successes she has created
