

This is a study guide for the Math 32 final, Fall 2013. It is not intended to be exhaustive. The best way to study is to do practice solving problems so I suggest you do as many problems as you can, not just the ones listed here. I would recommend doing the problems in the chapter review sections. The study guide ONLY covers trig, so you will need to review chapters 0-3, sec 7.1-7.2, and Appendix A as well. Good luck!

## Section 4.1-4.2

The unit circle: positive angles are measured counter-clockwise, negative angles are measured clockwise. We usually call an angle  $\theta$  (the Greek letter "theta"), but it can have any name.

$180^\circ = \pi$  radians.

To convert from radians to degrees, multiply by  $\frac{180}{\pi}$ .

To convert from degrees to radians, multiply by  $\frac{\pi}{180}$ .

**Most Likely to Succeed** Tony Wagner,Ted Dintersmith,2015-08-18 An urgent call for the radical re imagining of American education so that we better equip students for the realities of the twenty first century **The Brilliance of Black Children in Mathematics** Jacqueline Leonard,Danny B. Martin,2013-03-01 This book is a critically important contribution to the work underway to transform schooling for students who have historically been denied access to a quality education specifically African American children The first section of the book provides some historical perspective critical to understanding the current state of education in the U S specifically for the education of African American children The

following sections include chapters on policy learning ethnomathematics student identity and teacher preparation as it relates to the mathematical education of Black children Through offering counternarratives about mathematically successful Black youth advocating for a curriculum that is grounded in African American culture and ways of thinking providing shining examples of the brilliance of Blacks students and promoting high expectations for all rather than situating students as the problem the authors of this book provide powerful insights related to the teaching and learning of mathematics for African American students As is made evident in this book effective teaching involves much more than just engaging students in inquiry based pedagogy Kitchen 2003 The chapters offered in this book demonstrate how mathematics instruction for African American students needs to take into account historical marginalization and present day policies that do harm to Black students Kunjufu 2005 Empowering mathematics instruction for African American students needs to take into consideration and promote students cultural spiritual and historical identities Furthermore mathematics instruction for African American students should create opportunities for students to express themselves and the needs of their communities as a means to promote social justice both within their classrooms and communities **The New York Times Book Review** ,1959
