Allied Looting in World War II Kenneth D. Alford, 2014-01-10 Looting has long been recognized as one of the crimes committed by the Third Reich during World War II a crime which stripped economic wealth and artistic treasures from the populations the Nazis terrorized This historical text reveals the shocking extent of looting by Allied forces exploring their thievery against the Germans and others It follows the journey of the Hungarian Crown Treasure from a muddy oil drum in Austria to Fort Knox and back to Hungary and discusses numerous lost treasures ranging from priceless art works to rare manuscripts including the earliest known printing by the Gutenberg press [Air University Library Index to Military Periodicals](#) ,1955 [U.S. Government Books](#) ,1982 **The Foreign Burial of American War Dead** Chris Dickon, 2011-09-29 Normandy Flanders Field and other overseas cemeteries of the American Battle Monument Commission ABMC are well known However lesser known burial sites of American war dead exist all over the world in Australia and across the Pacific Rim in Canada and Mexico Libya and Spain most of Europe and as far north as the Russian Arctic This is the history of American soldiers buried abroad since the American Revolution It traces the evolution of American attitudes and practices about war dead and provides the names and locations of those still buried abroad in non ABMC locations

Bibliography of the History of Medicine ,1993 [A Command Post at War](#) David W. Hogan, 2000 Discusses the first Army headquarters in the European theater from its activation in October 1943 to V E Day in May 1945 Shows the Army headquarters of World War 2 as a complicated organization with functions ranging from the immediate supervision of tactical operations to long range operational planning and the sustained support of frontline units CMH Pub 70 60 [Air University Periodical Index](#) ,1958 [A - Airports](#) British Library, 2012-05-21 No detailed description available for A Airports [Arsenal of World War II](#) Paul A. C. Koistinen, 2004 Prolific munitions production keyed America's triumph in World War II but so did the complex economic controls needed to sustain that production Artillery tanks planes ships trucks and weaponry of every kind were constantly demanded by the military and readily supplied by American business While that relationship was remarkably successful in helping the U S win the war it also raised troubling issues about wartime economies that have never been fully resolved Paul Koistinen's fourth installment of a monumental five volume series on the political economy of American warfare focuses on the mobilization of national resources for a truly global war Koistinen comprehensively analyzes all relevant aspects of the World War II economy from 1940 through 1945 describing the nation's struggle to establish effective control over industrial supply and military demand and revealing the growing partnership between the corporate community and the armed services Koistinen traces the evolution of federal agencies mobilizing for war including the National Defense Advisory Commission the Office of Production Management and the Supply Priorities and Allocation Board and then focuses on the work of the War Production Board from 1942 1945 As the war progressed the WPB and related agencies oversaw the military's supply and procurement systems stabilized the economy while financing the war closely

monitored labor relations and controlled the shipping and rationing of fuel and food In chronicling American mobilization Koistinen reveals how representatives of industry and the armed services expanded upon their growing prewar ties to shape policies for harnessing the economy and how federal agencies were subsequently riven with dissension as New Deal reformers and anti New Deal corporate elements battled for control over mobilization itself As the armed services emerged as the principal customers of a command economy the military industrial nexus consolidated its power and ultimately succeeded in bending the reformers to its will The product of exhaustive archival research Arsenal of World War II shows that mobilization meant more than simply harnessing the economy for war it also involved struggles for power and position among a great many interest groups and ideologies Nearly two decades in the making it provides an ambitious and enormously insightful overview of the emergence of the military industrial economy one that still resonates today as America continues to wage wars around the globe *Cumulated Index Medicus* ,1986 **Variety TV REV 1991-92 17**
