

Renewable and Nonrenewable Energy – Cut and Paste Activity

Sources of energy are given below:

Geothermal

Solar

Oil

Wind

Tidal

Coal

Hydroelectricity

Nuclear

Geothermal

Natural gas

Directions: Cut out each source of energy and put them in the correct place on the diagram below to classify energy sources as renewable or nonrenewable.

Renewable Energy	Nonrenewable Energy
<ul style="list-style-type: none"> Energy resources that cannot be exhausted and is constantly renewed. 	<ul style="list-style-type: none"> Energy resources that are in limited supply, in danger of depletion, and take a very long time to make.

M'Rithaa,Richie Moalosi,Venny Nakazibwe,Jan Carel Diehl,2018-05-17 This open access book addresses the issue of diffusing sustainable energy access in low and middle income contexts Access to energy is one of the greatest challenges for many people living in low income and developing contexts as around 1 4 billion people lack access to electricity Distributed Renewable Energy systems DRE are considered a promising approach to address this challenge and provide energy access to all However even if promising the implementation of DRE systems is not always straightforward The book analyses discusses and classifies the promising Sustainable Product Service System S PSS business models to deliver Distributed Renewable Energy systems in an effective efficient and sustainable way Its message is supported with cases studies and examples discussing the economic environmental and socioethical benefits as well as its limitations and barriers to its implementation An innovative design approach is proposed and a set of design tools are supplied enabling readers to create and develop Sustainable Product

Service System S PSS solutions to deliver Distributed Renewable Energy systems Practical applications of the book s design approach and tools by companies and practitioners are discussed and the book will be of interest to readers in design industry governmental institutions NGOs as well as researchers

Learner-Centered Teaching Activities for Environmental and Sustainability Studies Loren B. Byrne,2016-03-21 Learner centered teaching is a pedagogical approach that emphasizes the roles of students as participants in and drivers of their own learning Learner centered teaching activities go beyond traditional lecturing by helping students construct their own understanding of information develop skills via hands on engagement and encourage personal reflection through metacognitive tasks In addition learner centered classroom approaches may challenge students preconceived notions and expand their thinking by confronting them with thought provoking statements tasks or scenarios that cause them to pay closer attention and cognitively see a topic from new perspectives Many types of pedagogy fall under the umbrella of learner centered teaching including laboratory work group discussions service and project based learning and student led research among others Unfortunately it is often not possible to use some of these valuable methods in all course situations given constraints of money space instructor expertise class meeting and instructor preparation time and the availability of prepared lesson plans and material Thus a major challenge for many instructors is how to integrate learner centered activities widely into their courses The broad goal of this volume is to help advance environmental education practices that help increase students environmental literacy Having a diverse collection of learner centered teaching activities is especially useful for helping students develop their environmental literacy because such approaches can help them connect more personally with the material thus increasing the chances for altering the affective and behavioral dimensions of their environmental literacy This volume differentiates itself from others by providing a unique and diverse collection of classroom activities that can help students develop their knowledge skills and personal views about many contemporary environmental and sustainability issues
