

Periodic Table Puzzle

Using the following list of clues, place each element in its proper position on the periodic table. The letters bear no similarity to the actual symbols for the elements. The truncated periodic table above shows only the first four periods of the representative elements and the noble gases. Hint - place each group in its proper position first, and then arrange the elements in each group.

CLUES

- The following elements are grouped together into families: URH, GSE, NEW, PQK, CDAB, LPZ, YXF, and MVOI.
- C is a more reactive metal than A and B.
- Q forms an oxide with oxygen in the following manner: Q_2O_3 .
- B is used as a medication for manic depression (bipolar disorder).
- T has the highest mass on the periodic table.
- Z is a liquid.
- J is a non-metal that was originally extracted from urine.
- P has three valence electrons on the third energy level and can be found in the kitchen.
- G has a higher electron affinity than both Y and K.
- S is a semi-metal that is used in the manufacturing of computer chips.
- D is the largest atom of the periodic table.
- N has a smaller 1st ionization energy than P or X.
- V does not have an electronegativity value.
- Y is more dense than J and X.
- Q has a smaller ionization energy than E.
- W has a greater effective nuclear charge than L, but less than N.
- F reacts with water to form a white, milky base solution and hydrogen gas.
- A is an element which can form both an anion and cation.
- S loses all of its 3rd shell electrons to form a +4 charge.
- P is the most electronegative element on the periodic table.
- O is lighter than air and has the lowest melting point of all the elements.
- U has a more negative electron affinity than both M and W.

Parliamentary Debates New Zealand. Parliament,1980 **The Concept of Unity in Public International Law**

Mario Prost,2012-03-15 Fragmentation has become a defining albeit controversial metaphor of international law scholarship in the era of globalisation Some scholars see it as a new development others as history repeating itself some approach it as a technical issue and some as the reflection of deeper political struggles But there is near consensus about the fact that the established vision of international law as a unitary whole is under threat At the core of the fragmentation debate lies the concept of unity but this is hardly ever rationalised and is more assumed than explained Its meaning remains vague and intuitive The Concept of Unity in Public International Law attempts to dispel that vagueness by exploring the various possible meanings of the concept of unity in international law However eschewing one grand theory of unity it identifies and compares five candidates Intentionally pluralistic in its outlook the book does not engage in normative arguments about whether international law is or should be unitary but seeks to show instead that the concept of unity is contested and that discourses on fragmentation are necessarily contingent The thesis on which the book is based won the 2009 Prize for best doctoral thesis from the Association des professeurs de droit du Qu bec *The Shaping of Indian Science: 1914-1947* ,2003 This is a compendium of the speeches of the Presidents of the Indian Science Congress Association ISCA from 1914 2003 Through the years these Presidents have inspired the Congress by their speeches some of them visionary some impassioned in their plea for Science but all of them with a message that Science must be used for the good of the human race
