Data Science, Human Science, and Ancient Gods Sandra Blakely, Megan Daniels, 2023-05-01 The studies in this volume share a focus on religion in the ancient Mediterranean world How ritual myth spectatorship and travel reflect the continual interaction of human beings with the richly fictive beings who defined the boundaries of groups access to the past and mobility across land and seascapes They

share as well the methodological exploration of the intersection between human sciences the integration of numerous disciplines around the study of all aspects of human life from the biological to the cultural and the study of the past In so doing they continue a long dialogue that engages with critical models derived from specializations within history philology archaeology sociology and anthropology and addresses increasingly the potentialities and pitfalls of quantitative and digital analyses Many of the threads in this long conversation inform these chapters the comparative project human social evolution disciplinary reflexivity religion as an embedded functional and structural system and the role for agency networks and materiality

T. S. Eliot, France, and the Mind of Europe Jayme Stayer, 2015-09-18 In late 1910 after graduating from Harvard with a master's degree in philosophy the young T S Eliot headed across the Atlantic for a year of life and study in France a country whose poets had already deeply affected his sensibility His short year there was to change him even more decisively as he rubbed up against the artistic philosophical psychological and political currents of early century Paris The absorbent mind of Eliot as shaped by what he later termed the mind of Europe was a node in this interlocking grid of influences As there is no understanding T S Eliot without considering the impact of French art and thought on his development this volume serves both as a centennial commemoration of Eliot's year in Paris and as a reconsideration of the role of France and more widely Europe as they bore on his growth as an artist and critic Most scholarship on Eliot and France has focused on Eliot's relationship to the nineteenth century Symbolists and to the philosophy of Henri Bergson This old frame of reference is broken apart in favor of a much wider field that still takes Paris as its center but reaches across national borders The volume is divided into two overlapping sections the first Eliot and France focuses on French authors and trends that shaped Eliot and on the personal experiences in Paris that are legible in his artistic development The second section Eliot and Europe situates Eliot in a broader matrix including Anglo French literary theory evolutionary sociology and German influences Contributors include several highly respected names in the field of modernist studies including Jean Michel Rabat Jewel Spears Brooker and Joyce Wexler as well as a number of well established Eliot scholars Reflecting multiple perspectives this volume does not offer a single revisionist take on French and European influence in Eliot's work Rather it circles back to familiar territory deepening and complicating the accepted narratives It also opens up new veins of inquiry from unexpected sources and understudied phenomena drawing on the recently published letters and essays that are currently remapping the field of Eliot studies
