

2. From popup menu select **Insert controls -> Current Date(long format)**.
A label is placed with **Caption** property set to %D (which stands for date long format).
3. Place a label on the left of it and change it's **Caption** property to "Date:"
4. Click right button on the data report again and select **Insert Controls -> Current Page Number**.
Another label is placed with caption %p (which means current page number). You can also select **Total Number of Pages**, which means a label with caption %P (capital P).
5. Place a label on the left and change caption to "Page:"
6. Change **Font Bold** setting of "Date:" and "Page:" labels to **True**.

Arrange all labels and fields in a neat format and then run the report (click on **Products List** command button). Your report should look like the one shown in figure 23.4.

Introduction to data reports

Reports are important and useful in many respects because they provide useful and meaningful information concerning a set of data. In this chapter, we will show you how to create a report in Visual Basic 6.

In previous versions of Visual Basic 6, there is no primary reporting . Previous versions of Visual basic 6 uses Crystal Reports tool, a software from Seaglide. Fortunately, Microsoft has integrated a good report writer into Visual Basic 6, so you no longer need to use Crystal Report.

Steps in building your report in Visual Basic 6

Visual Basic 6 provides you with a **data report designer** to create your report, it is somewhat similar to data report designer in Microsoft Access. The **data report designer** has its own set of controls which allow you to customize your report seamlessly. The steps in creating the report in VB6 are listed below:

Step 1: Adding Data Report

Start Visual Basic as a **Standard EXE** project. From the **Project** menu in the VBE, select **Add Data Report** in the dropdown menu. Now, you will be presented with the data report environment, as shown in Figure 40.1. The data report environment contains 6 controls, they are **RptTextBox**, **RptLine**, **RptFunction**, **RptLabel**, **RptImage** and **RptShape**.

You can customize your report here by adding a title to the page header using the report label **RptLabel**. Simply drag and draw the **RptLabel** control on the data report designer window and use the **Caption** property to change the text that should be displayed. You can also add graphics to the report using the **RptImage** control.
