*South African Accounting Education Stocktake* Jaco Fouchè, Nico van der Merwe, 2020-04-07 This book is intended to take stock of the current state of accounting education with a specific emphasis on the South African situation. It provides a critical overview of the current published research and identified gaps. Through this it aims to equip accounting academics with information and tools to motivate them to research the field of accounting education to improve teaching and learning. It also aids in the identification of suitable research topics in this regard and highlights potential pitfalls in researching accounting education. The book therefore focuses on accounting educators as specialists in their respective disciplines. Different authors with a keen interest in a specific area relating to accounting education research wrote each chapter in this book. It forms a planned collective work assembled by appropriately qualified and experienced scholars in the accounting education field which generates a new conceptual synthesis that advances scholarship of accounting education research since no such synthesis currently exists for accounting education research in South Africa.

*Economic Shocks and Globalisation* Elsabé Loots, 2024-08-01 Over the 153 year period since 1870 the phenomenon of globalisation has been shaped and reshaped. As we look back at the events that shaped our understanding of the process and its momentum before and after the Global Financial Crisis (GFC) it became clear that the process of globalisation has changed and continues to evolve which requires a deeper analysis. The book answers the question of why the performance of the hyper globalisation period has not continued during the post GFC period after 2010 and what might be expected going forward. Apart from the fact that the fourth globalisation wave period between 2010 to the early 2020s has been characterised by a range of global shocks that caused more volatility, instability and uncertainty, the major economic determinants of globalisation have also slowed markedly. The outbreak of the COVID 19 pandemic followed by the geopolitical uncertainty and instability all caused global contagion effects around the world with economic, socio-economic and geopolitical consequences and responses. This book aims to analyse most of these global events and shocks and attempted to gather a deeper understanding of the present drivers of globalisation and what the major trends and shifts are geo-economically, socio-economically and geopolitically. The conclusions drawn include that globalisation remains despite the current slowbalisation an integrated process that is globally entrenched yet complex, cyclical, multifaceted and multiplex. This book is aimed at academics in economics, political sciences, social sciences and may also find an audience among international policymakers and scholars at multilateral institutions such as the World Bank and the United Nations.
