Northwest University Potchestroom Nsfas 2016:

Urban Tourism in the Global South Christian M. Rogerson, Jayne M. Rogerson, 2021-07-13 This book examines and addresses the particular character of urban tourism occurring in the global South. It presents research essays on tourism in urban areas of South Africa, a country which is associated with big 5 nature tourism but where urban areas are also major tourism destinations. The book contextualizes urban tourism in South Africa as part of the other half of urban tourism, an overlooked but energetic scholarship which is emerging on urban places in the global South. The volume moves to present a collection of original material variously on national perspectives on urban tourism following by a cluster of city level perspectives. The last three contributions turn to the role of tourism in small towns, the bottom rung in the urban settlement system. Issues of concern include gastronomic tourism, VFR travel, airports, landscapes, climate change, Airbnb and creative tourism. Finally, as COVID 19 is potentially a defining historical moment for urban tourism, the volume incorporates historical research perspectives in order to address the overwhelming present mindedness of mainstream urban tourism writings. The book highlights the challenges and opportunities for tourism development in the environment of the urban global South and is relevant to scholars of both tourism and urban studies as well as researchers in development studies.

Education for sustainable development in BRICS Ewelina K. Niemczyk, 2023-03-01 In the past ten years, the concept of education for sustainable development has become one of UNESCO's key educational initiatives to address current global challenges. However, the attention was mainly devoted to primary and secondary education and higher education was somewhat neglected. The primary focus on basic education has also diverted academic attention from the research exploring the relationship between higher education and sustainable development. Only recently has the academic discourse on this topic begun to gain ground. On that note, this book is meant to place higher education at the core of the necessary transformations to create awareness of more sustainable practices and policies.
