foods such as grains oilseeds pulses and sugar It outlines the underlying changes that are currently occurring which will have an influence on the direction of future food supply chains and provides some solutions to current food security problems Based on an analysis of total regulation in the 1950s 60s through to deregulation during the 1980 90s as well as post deregulation it focuses on liberal trade and deregulation as a more successful solution to creating efficiencies in food supply chains and distribution The author highlights a common thread of either farmers using government for vested interest intervention or autocratic governments seeking market and supply chain power The book examines the role of government after 70 years of food supply chain intervention It discusses the role of commercial trade markets and cluster industries and how these can quickly disintegrate when price distortions occur The author studies both food importing and exporting countries and concludes that comingled commoditization of food has led to increased hoarding corruption and dependence on food aid He argues that a competitive food supply chain that has minimum intervention is more likely to provide future food security In conclusion the book emphasizes that adequate rewards competition and striving for supply chain efficiencies are the essences of sustainable food security

Cultures in Movement Martine Raibaud, Ionut Untea, Micéala Symington, 2015-02-05 The contributors to this volume encourage a re thinking of the very notion of culture by examining the experiences situations and the representations of those who chose or were forced to change cultures from the nineteenth century to the present day Beyond a simple study of migration forced or otherwise this collective work also re examines the model of integration As recent entrants into new social settings may be perceived as affecting the previously accepted social equilibrium mechanisms encouraging or inhibiting population flows are sometimes put in place From this perspective integration may become less a matter of internal choice than an external obligation imposed by the dominant political power in which case integration may only be a euphemism for cultural uniformity The strategies of cultural survival developed as a reaction to such a rising tide of cultural uniformity can be seen as necessary points of departure for an ever growing shared multiculturalism A long term voluntary commitment to make cultural boundaries more flexible and allow a more engaged individual participation in the process of defining the self and finding its place within a culture in movement may represent a key element for cultural cohesion in a globalized world
