Franklin, Michael C. Steiner, 1992 Water Lore Camille Roulière, Claudia Egerer, 2022-05-19 Located within the field of environmental humanities this volume engages with one of the most pressing contemporary environmental challenges of our time how can we shift our understanding and realign what water means to us Water is increasingly at the centre of scientific and public debates about climate change In these debates rising sea levels compete against desertification hurricanes and floods follow periods of prolonged drought As we continue to pollute canalise and desalinate waters the ambiguous nature of our relationship with these entities becomes visible From the paradisiac and pristine scenery of holiday postcards through to the devastated landscapes of post tsunami news reports images of waters surround us And while we continue to damage what most sustains us collective precarity grows Breaking down disciplinary boundaries with contributions from scholars in the visual arts history earth systems anthropology architecture literature and creative writing archaeology and music this edited collection creates space for less prominent perspectives with many authors coming from female Indigenous and LGBTQIA contexts Combining established and emerging voices and practice led research and critical scholarship the book explores water across its scientific symbolic material imaginary practical and aesthetic dimensions It examines and interrogates our cultural construction and representation of water and through original research and theory suggests ways in which we can reframe the dialogue to create a better relationship with water sources in diverse contexts and geographies This expansive book brings together key emerging scholarship on water persona and agency and would be an ideal supplementary text for discussions on the blue humanities climate change environmental anthropology and environmental Natural Discourse Sidney I. Dobrin, Christian R. Weisser, 2012-02-01 The first full length book to address the history relationships between environment and discourse Natural Discourse explains why and how ecocomposition has become such a critical part of composition studies Beginning by exploring the roots of ecocomposition including a history of the use of the term ecocomposition the book then examines ecological aspects of composition studies and looks at how ecocomposition is informed by ecocriticism cultural studies ecofeminism environmental rhetoric and composition studies The authors draw on their own experiences as teachers of writing and outdoor enthusiasts to describe how ecocomposition can address issues of language and nature public intellectualism and pedagogy **Nature Writing** Don Scheese, 2013-10-28 In this comprehensive study of the genre Don Scheese traces its evolution from the pastoralism evident in the natural history observations of Aristotle and the poetry of Virgil to current American writers He documents the emergence of the modern form of nature writing as a reaction to industrialization Scheese's personal observations of natural settings sharpen the reader's understanding of the dynamics between author and locale His study is further informed by ample use of illustrations and close readings core writers such as Thoreau John Muir and Mary Austin showing how each writer s work exemplifies the A Voice for Earth Peter Blaze Corcoran, A. James pastoral tradition and celebrate a spirit of place in the United States Wohlpart, Brandon P. Minteer, Harry Greene, 2023-09-12 Zoos have always had a troubled relationship to what is considered the real wild Even the most immersive and naturalistic zoos critics maintain are inherently contrived and inauthentic environments Zoo animals diet care and reproduction are under pervasive human control with natural phenomena like disease and death kept mostly hidden from public view Furthermore despite their growing commitment to conservation and education zoos are entertainment providers that respond to visitors expectations and preferences What would a wilder zoo one that shows the public a wider range of ecological processes look like Is it achievable or even desirable What roles can or should zoos play in encouraging humanity to find meaningful connections with wild animals and places A Wilder Kingdom is a provocative and reflective examination of the relationship between zoos and the wild It gathers a premier set of multidisciplinary voices from animal studies and psychology to evolutionary biology and environmental journalism to consider the possibilities and challenges of making zoos wilder In so doing the contributors offer new insights into the future of the wild beyond zoos and our relationship to wild species and places across the landscape in an increasingly human dominated era **Network Nature** Richard Coyne, 2019-10-31 How do people avoid the stresses of the digital age Urban dwellers must now turn to nature to recover restore and rebalance after the stresses brought on by relentless digital connectivity It is easy to task nature as the cure with technology as the ailment In Network Nature Richard Coyne challenges the definitions of both the natural and the artificial that support this time worn narrative of nature s benefits In the process he attacks the counter claim that nature must succumb to the sovereignty of digital data Covering a spectrum of issues and concepts from big data and biohacking to animality numinous spaces and the post digital he draws on the rich field of semiotics as applied to natural systems and human communication to enhance our understanding of place landscape and architecture in a digital world The City Natural Shen Hou, 2010-11-23 The weekly magazine Garden and Forest existed for only nine years 1888 1897 Yet in that brief span it brought to light many of the issues that would influence the future of American environmentalism In The City Natural Shen Hou presents the first biography of this important but largely overlooked vehicle for individuals with the common goal of preserving nature in American civilization As Hou s study reveals Garden and Forest was instrumental in redefining the fields of botany and horticulture while also helping to shape the

fledgling professions of landscape architecture and forestry The publication actively called for reform in government policy urban design and future planning for the preservation and inclusion of nature in cities It also attempted to shape public opinion on these issues through a democratic ideal that every citizen had the right and need to access nature These notions would anticipate the conservation and city beautiful movements that followed in the early twentieth century Hou explains the social and environmental conditions that led to the rise of reform efforts organizations and publications such as Garden and Forest She reveals the intellectual core and vision of the magazine as a proponent of the city natural movement that sought to relate nature and civilization through the arts and sciences Garden and Forest was a staunch advocate of urban living made better through careful planning and design As Hou shows the publication also promoted forest management and preservation not only as a natural resource but as an economic one She also profiles the editors and contributors who set the magazine s tone and follows their efforts to expand America s environmental expertise Through the pages of Garden and Forest the early period of environmentalism was especially fruitful and optimistic many individuals joined forces for the benefit of humankind and helped lay the foundation for a coherent national movement Shen Hou's study gives Garden and Forest its due and adds an important new chapter to the early history of American environmentalism **Environmental Imagination** Lawrence Buell, 1995 With Thoreau s Walden as a touchstone Buell offers an account of environmental perception the place of nature in the history of Western thought and the consequences for literary scholarship of attempting to imagine a more ecocentric way of being In doing so he provides a profound rethinking of our literary and cultural reflections on nature Desert Spirit Places Brad Karelius, 2018-12-19 The iconic landscape of the American Southwest reveals the luminescent Mitten rock formations looming rock arches and vast sagebrush oceans made vivid and memorable by writer Tony Hillerman artist Georgia O Keefe and director John Ford Professor Brad Karelius drawing on forty years of college teaching will guide you into hidden mysteries of the sacred as revealed by the Zuni Navajo Dine Hopi Hispanos and desert mystics as you seek spiritual encounters in these desert spirit places
