

1 CHOOSE A TARGET

Take the telescope outside during the day and find an easily recognizable object, such as a streetlight, car license plate or sign. The object should be as far away as possible, but at least a quarter mile away.

2 CENTER THE TARGET IN THE EYEPIECE

Look through the telescope using your lower powered eyepiece. Move the telescope until the object you chose lies in the center of the view. If the image is blurry, gently turn the focus knobs on either side of the telescope until it comes into sharp focus.

NOTE: The image in your telescope may appear inverted. This is perfectly normal in an astronomical telescope.

The finder is one of the most important parts of your telescope. It helps you locate objects and center them in the eyepiece. The first time you assemble your telescope, you need to align the finder to the telescope's main optics. It's best to do this during the day*.

***SOLAR WARNING!** Never attempt to view the Sun through any telescope without a proper solar filter!

3 LOOK THROUGH FINDERSCOPE

Once the object is centered in your 25 mm eyepiece, look through the finderscope and locate the red dot.

4 ADJUST THE FINDERSCOPE

Without moving the telescope, use the two adjustment knobs to move the finder around until the red dot appears over the same object you are observing in the telescope's 25 mm eyepiece.

5 YOUR FINDERSCOPE IS NOW ALIGNED!

It should not require realignment unless it is bumped or dropped.

Venture Telescope User Guide:

The NexStar User's Guide Michael Swanson, 2012-12-06 Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this one that provides a complete detailed guide to buying using and maintaining NexStar telescopes. Although this book is highly comprehensive it is suitable for beginners; there is a chapter on Astronomy Basics and experts alike. Celestron's NexStar telescopes were introduced in 1999 beginning with their first computer controlled go to model a 5 inch. More models appeared in quick succession and Celestron's new range made it one of the two dominant manufacturers of affordable go to telescopes. **The NexStar**

Evolution and SkyPortal User's Guide James L. Chen, Adam Chen, 2016-05-26 This book serves as a comprehensive guide for using a Nexstar Evolution mount with WiFi SkyPortal control, walking the reader through the process for aligning and operating the system from a tablet or smartphone. The next generation Go To mount from Celestron; this is compatible not only with the Nextstar Evolution but also with older mounts. It is the ideal resource for anyone who owns or is thinking of owning a Nexstar Evolution telescope or adapting their existing Celestron mount. Pros and cons of the system are thoroughly covered with a critical depth that addresses any possible question by users. Beginning with a brief history of Go To telescopes and the genesis of this still new technology, the author covers every aspect of the newly expanding capability in observing. This includes the associated Sky Portal smartphone and tablet application, the transition from the original Nexstar GoTo system to the new SkyPortal system, the use of the Sky Portal application with its Sky Safari 4 basic software and Celestron WiFi adaptations and discussions on the use of SkyPortal application using the Celestron adapter on older Celestron mounts. Comments and recommendations for equipment enable the reader to successfully use and appreciate the new WiFi capability without becoming overwhelmed. Extensively illustrated using actual screenshots from the program interface, this is the only guide to the Nextstar SkyPortal an observer will need. *New Venture Creation* Marc H. Meyer, Frederick G.

Crane, 2013-01-04 Structured around the idea that innovation is at the core of successful entrepreneurship, this insightful guide by Meyer and Crane establishes innovation as a necessary first step before writing a business plan or developing a financial model. With a focus on pragmatic methods for gaining industry and customer insight and translating this insight into innovative product and service solutions, Meyer and Crane help students design robust business models, financial projections, business plans, and investor presentations. *New Venture Creation* is devoted to helping students develop compelling business ideas. This is based not only on the authors' well-known research in product and service innovation but also on their extensive experience as successful entrepreneurs and investors.
