

## EXPERIMENT NO. 7

# The Vernier and Micrometer Calipers

---

### I. OBJECTIVES

- To learn the proper use of the Vernier and Micrometer Calipers
- To make accurate measurements of short distances using the Vernier and Micrometer calipers.

### II. THEORY/DISCUSSION

The accuracy of a measurement is always limited by the precision of the apparatus used and the skill of the Observer in using it. No reading on an apparatus used in measuring physical quantities is ever exact since a point is always reached at which the reading becomes uncertain. The last or final digit of the reading is often just an estimate and, therefore, doubtful. However, this digit is important because it might significantly affect the results of the computations.

In linear measurement, the meter stick can be used. But because of the limited accuracy of the meter stick in measuring small objects, one should resort to the use of the vernier and micrometer calipers.
