As a way to understand the contemporary project in architecture this book provides an index of ideas theories projects and definitions that string into a methodology for evaluating the contemporary language of architecture described as contemporism through a review of topology form and typology system and elements The contemporary project has been trying to answer the postmodern question of how to move beyond modernism through a thread of architectural styles that tried to respond to deficiencies from the modern promise and contextual changes Yet the question remains should this ongoing struggle to move beyond modernism be a stylistic battle Has the present architectural practice ever left the modernist tendencies and is there a structure for a contemporary language in architecture This book presents a collection of highly illustrated projects that have worked under these parameters to break away from modernism in order to present a holistic integration of topology and typology as a language for contemporism The index is illustrated with individual spreads which can be read sequentially or independently and encourages the reader to make their own connections It also includes interviews and contributions from Toyo Ito Anthony Vidler Ben van Berkel Christian Kerez and Greg Lynn This book is essential reading for undergraduate and graduate students in architecture Technological Paradigms and Digital Eras

Giacomo Chiesa, 2019-07-24 The book connects the ICT and the architectural worlds analyzing modeling materialization and data driven visions for design issues at different scales Furthermore using sample modeling and materialization tools it explores the links between performance driven design approaches and the application of new digital technologies Intended for architects and urbanists it provides a theoretical framework to address the implications of the digital revolution in building design and operation Furthermore combining insights from IT and ICT with architectural and urban design know how it offers engineering professionals a technology driven interpretation of the building design field **Three Centuries**
