**Leap** Bob Schmetterer, 2003-03-10 Traditionally company leaders develop a

business strategy based on bottom lines and profit margins then hire an ad agency to back up that strategy with creative advertising But history shows that some of the most effective branding campaigns are born when companies work with ad agencies to develop a business strategy that has a big creative idea at its heart what CEO of Euro RSCG Bob Schmetterer calls the Creative Business Idea In Leap Bob Schmetterer shows advertisers how to combine advertising creativity and bottom line realities to develop winning business strategies and winning ad campaigns He analyzes some of the most creative business ideas in history showing how successful advertising and marketing strategies do more than simply communicate the brand they define it Advertisers know how to create demand for an existing brand but Schmetterer argues that the next challenge for advertisers is to help their clients apply creative thinking to their core business strategy before they launch a branding blitz Leap is about connecting the left brain and the right brain to develop solid business strategies that are also creative fresh and exciting It s about mixing business s cold fixation on numbers with the warm heart of art and creativity to build revolutionary brands It s about connecting with and listening to the client understanding the business and the product tapping into the client s passion for the product and transmitting that passion to the consumer It s about what happens when the business makes creativity part of its core strategy enabling it to move beyond self imposed boundaries and expand the limits of its reach With a wealth of examples from Volvo to Purdue Schmetterer shows ad agencies and managers how to help their clients develop the big creative idea that will transform their businesses and perhaps their industries It s time for companies to make the Leap that synthesizes business and creativity to reap the full rewards of profitable innovation BOB SCHMETTERER is Chairman and CEO of Euro RSCG Worldwide a one of the world s top five global advertising and communications agencies with clients such as Intel Peugeot Air France Orange Abby National MCI Danone Group Reckitt Benckiser Volvo and Yahoo **Auto e fisco. Con CD-ROM** Albino Leonardi, Simone Dimitri, Clara Pollet, 2016

Development of a Methodology for the Evaluation of Active Safety using the Example of Preventive Pedestrian Protection Thomas Helmer, 2014-11-28 The book reports on a new methodology for optimization and evaluation of traffic safety which simulates the processes involved in traffic conflicts on the basis of detailed dynamical human and technical models The models incorporate the whole spectrum of human cognitive functions and responses the responses of an active safety system and the interactions between the human and the system as they occur in a sample of relevant traffic contexts Using the developed method the author was able to assess the reduction in accidents and injuries as well as the possible side effects resulting from a preventive pedestrian protection system The book provides practical solutions in the area of active safety systems It represents an interesting source of information for researchers and professionals as well as all stakeholders including policy makers and consumer advocates with the common goal of promoting the implementation and adoption of highly efficient systems for preventing accidents and injuries *Marketing Intelligent Systems Using Soft Computing* Jorge Casillas, Francisco J. Martínez López, 2010-10-05 Dr Jay Liebowitz Orkand Endowed Chair in Management and Technology

University of Maryland University College Graduate School of Management Technology 3501 University Boulevard East  
Adelphi Maryland 20783 8030 USA jliebowitz umuc edu When I first heard the general topic of this book Marketing  
Intelligent Systems or what I ll refer to as Marketing Intelligence it sounded quite intriguing Certainly the marketing field is  
laden with numeric and symbolic data ripe for various types of mining data text multimedia and web mining It s an open  
laboratory for applying numerous forms of intelligentsia neural networks data mining expert systems intelligent agents  
genetic algorithms support vector machines hidden Markov models fuzzy logic hybrid intelligent systems and other  
techniques I always felt that the marketing and finance domains are wonderful application areas for intelligent systems and  
this book demonstrates the synergy between marketing and intelligent systems especially soft computing Interactive  
advertising is a complementary field to marketing where intelligent systems can play a role I had the pleasure of working on  
a summer faculty f lowship with R GA in New York City they have been ranked as the top inter tive advertising agency  
worldwide I quickly learned that interactive advertising also takes advantage of data visualization and intelligent systems  
technologies to help inform the Chief Marketing Officer of various companies Having improved ways to present information  
for strategic decision making through use of these technologies is a great benefit *Customer-Oriented Quality  
Management in the Automotive Industry* Marit Breinfeld, 2005-02-28 Inhaltsangabe Abstract In times of severe competition it  
is of crucial importance to create a competitive advantage to differentiate from the competitors and to sustain the business of  
the company This thesis intends to show that a customer focused quality management is one way to create a sustainable  
competitive advantage Quality controls along the whole value chain before during and after production leads to failure free  
products which save costs on the one hand and have thus a positive influence on the company s revenue On the other hand  
failure free products that meet the customers expectations lead to satisfied customers who build up a brand loyalty and  
conduct retention sales which have a positive influence on the company s sales market share as well as the overall image  
Furthermore this thesis points out that it is important to listen to the voice of the customers and get an insight in the  
customer s needs and wants To fulfil or even exceed their expectations leads to customer satisfaction which is a key to  
success in today s business world In addition the customer demands in regard of quality are growing continuously and new  
technologies are appearing on the markets on a regular basis Therefore the producers are forced to keep to the latest  
technology developments and to get hold on the changing customer needs But even without this external pressure quality  
improvement is justified from a cost point of view The applicability of a customer oriented quality management is shown in  
the practical part of this thesis when the quality of the Saab models is analyzed from the customer s perspective Due to the  
arguments outlined in this thesis it can be summarized that a quality management with a focus on the needs of the customers  
in should become a core strategy of any company producing and selling products in order to create customer satisfaction and  
sustain the business This thesis deals with the field of quality management in the context of customer satisfaction To show

the practical applicability of quality management this thesis is looking at how quality management is conducted in the automotive industry as we compare the Initial Quality Study IQS from the market research institute J D Power with a survey that was internally conducted at the Saab Automobile AB Today s business environment creates a growing need for quality management Tougher competition leads to the demand for cost savings and higher **Departments of Transportation and Treasury, and Independent Agencies Appropriations for 2004: Federal Highway Administration** United States.
