consider sound and its concepts taking as their premise the idea that popular culture can be analyzed in an innovative way

through sound The wide ranging texts in this book take as their premise the idea that sound is a subject through which

popular culture can be analyzed in an innovative way From an infant s gurgles over a baby monitor to the roar of the crowd

in a stadium to the sub bass frequencies produced by sound systems in the disco era sound not necessarily aestheticized as

music is inextricably part of the many domains of popular culture Expanding the view taken by many scholars of cultural

studies the contributors consider cultural practices concerning sound not merely as semiotic or signifying processes but as

material physical perceptual and sensory processes that integrate a multitude of cultural traditions and forms of knowledge

The chapters discuss conceptual issues as well as terminologies and research methods analyze historical and contemporary

case studies of listening in various sound cultures and consider the ways contemporary practices of sound generation are

applied in the diverse fields in which sounds are produced mastered distorted processed or enhanced The chapters are not

only about sound they offer a study through sound echoes from the past resonances of the present and the contradictions and

discontinuities that suggest the future Contributors Karin Bijsterveld Susanne Binas Preisend rfer Carolyn Birdsall Jochen
