Status Signals Joel M. Podolny,2010-12-16 Why are elite jewelers reluctant to sell turquoise despite strong demand Why did leading investment bankers shun junk bonds for years despite potential profits Status Signals is the first major sociological examination of how concerns about status affect market competition Starting from the basic premise that status pervades the ties producers form in the marketplace Joel Podolny shows how anxieties about status influence whom a producer does or does not accept as a partner the price a producer can charge the ease with which a producer enters a market how the producer s inventions are received and

ultimately the market segments the producer can and should enter To achieve desired status firms must offer more than strong past performance and product quality they must also send out and manage social and cultural signals Through detailed analyses of market competition across a broad array of industries including investment banking wine semiconductors shipping and venture capital Podolny demonstrates the pervasive impact of status Along the way he shows how corporate strategists tempted by the profits of a market that would negatively affect their status consider not only whether to enter the market but also whether they can alter the public's perception of the market Podolny also examines the different ways in which a firm can have status Wal Mart for example has low status among the rich as a place to shop but high status among the rich as a place to invest Status Signals provides a systematic understanding of market dynamics that have until now not been fully appreciated
