wind and errors in the forecast radius of 30 and 50 kt winds The profile errors are used to estimate the probability of 30 and 50 kt winds occurring at a point given that the cyclone occupies a particular position These position and wind probability elements are combined by using an assumption of independence which is supported by correlation coefficients The model which includes features of the earlier strike probability model is tested on independent data Test results are shown to illustrate good agreement between forecast probability and the frequency of occurrence of 30 and 50 kt winds Author

Year-book of Australia, 1891 **Gun Fights, Ghosts and Goannas** Gary Wood, 2024-10-01 Ever since he was a young man living on the Gold Coast Gary had dreamed of riding a motor cycle around Australia His focus on family qualifications career and mortgage conspired to push this dream out of his mind Life had stopped being fun and he could see that it wouldn't get better unless he changed his thinking Then one night while lying in his hammock sipping red wine and listening to music a song from his past came over the speaker It was a message from his younger self reminding him of his dreams He made a goal got a motorcycle and some camping gear and within two years he was on a solo motorcycle adventure through Queensland This book is more than a motorcycle travel story it's an adventure through the heart of Queensland and the soul of Australia Along the way Gary learns the secret of life loses his money by betting on chickens and solves the murder of the swaggie from the song Waltzing Matilda His message to the reader is that it's never too late to set and achieve goals If he can do it anyone can and it's easier than you think Just twist the throttle and look out for kangaroos
