Weather Studies - Textbook and Investigations Manual Academic Year 2012 - 2013 and Summer 2013 American Meteorological Society, 2012-07-01 Weather Studies American Meteorological Society. Education Program, 2012 Western Disturbances - An Indian Meteorological Perspective A.P. Dimri, Amulya Chevuturi, 2016-02-09

This book examines the meteorological phenomenon known as Western Disturbances WDs and traces their influence on the Indian subcontinent. It fully details the unique characteristics and dynamics of these disturbances which produce large scale instabilities in the atmosphere over northern India due to the orographic influence of the Himalayas. The authors first present a definition of the phenomenon and then go on to detail their structure and migration. Topics include dynamics, energetics and thermodynamics, modelling, studies, land use and land cover interactions and WDs in the changing climate. In addition, coverage outlines how WDs interact with and influence other weather systems throughout the four seasons of Indian climate: winter, pre monsoon, monsoon and post monsoon. It places special emphasis on wintertime dynamics since WDs significantly contribute to the precipitation in India during this time. The authors explain why this period should be termed Indian winter monsoon and differentiate it from the northeast monsoon which so far is the prevalent term used in the region's meteorological parlance. Complete with detailed illustrations and case studies, this monograph will help researchers and students gain a fundamental understanding of these important storms. This knowledge is essential not only for short term and seasonal hydrometeorological forecasting but also for the assessment of regional climate change and its impacts. *Foreign Object Debris and Damage in Aviation* Ahmed F. El-Sayed, 2022-04-27

Foreign Object Debris and Damage in Aviation discusses both biological and non biological Foreign Object Debris (FOD) and associated Foreign Object Damage (FOD) in aviation. The book provides a comprehensive treatment of the wide spectrum of FOD with numerous cost management and wildlife considerations. Management control for the debris begins at the aircraft design phase and the book includes numerical analyses for estimating damage caused by strikes. The book explores aircraft operation in adverse weather conditions and inanimate FOD management programs for airports, airlines, airframe and engine manufacturers. It focuses on the sources of FOD, the categories of damage caused by FOD and both the direct and indirect costs caused by FOD. In addition, the book provides management plans for wildlife including positive and passive methods. The book will interest aviation industry personnel, aircraft transport and ground operators, aircraft pilots and aerospace or aviation engineers. Readers will learn to manage FOD to guarantee air traffic safety with minimum costs to airlines and airports. **Bridge Safety, Maintenance, Management, Life-Cycle, Resilience and Sustainability** Joan Ramon Casas, Dan M.

Frangopol, Jose Turmo, 2022-06-27 Bridge Safety Maintenance Management Life Cycle Resilience and Sustainability contains lectures and papers presented at the Eleventh International Conference on Bridge Maintenance Safety and Management IABMAS 2022 Barcelona Spain 11-15 July 2022. This e-book contains the full papers of 322 contributions presented at IABMAS 2022 including the T.Y. Lin Lecture, 4 Keynote Lectures and 317 technical papers from 36 countries all around the world. The contributions deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of safety, maintenance, management, life cycle, resilience, sustainability and technological innovations of bridges. Major topics include advanced bridge design, construction and maintenance approaches, safety, reliability and risk evaluation, life cycle management, life cycle resilience, sustainability, standardization, analytical models, bridge management systems, service life prediction, structural health monitoring, non-destructive testing and field testing, robustness and redundancy, durability enhancement, repair and rehabilitation, fatigue and corrosion, extreme loads, needs of bridge owners, whole life costing and investment for the future, financial planning and application of information and computer technology, big data analysis and artificial intelligence for bridges among others. This volume provides both an up-to-date overview of the field of bridge engineering and significant contributions to the process of making more rational decisions on bridge safety, maintenance, management, life cycle, resilience and sustainability of bridges for the purpose of enhancing the welfare of society. The volume serves as a valuable reference to all concerned with and/or involved in bridge structure and infrastructure systems including students, researchers and practitioners from all areas of bridge engineering.

Flood and Coastal Erosion Risk Management Edmund Penning-Rowsell, Sally Priest, Dennis Parker, Joe Morris, Sylvia Tunstall, Christophe Viavattene, John Chatterton, Damon Owen, 2014-01-03. A new Multi-Coloured Manual. This book is a successor to and replacement for the highly respected manual and handbook on the benefits of flood and coastal risk management produced by the Flood Hazard Research Centre at Middlesex University UK with support from Defra and the Environment Agency. It builds upon a previous book known as the multi-coloured manual 2005 which itself was a synthesis of the blue 1977, red 1987 and yellow manuals 1992. As such it expands and updates this work to provide a manual of assessment techniques of flood risk management benefits, indirect benefits and coastal erosion risk management benefits. It has three key aims. First it provides methods and data which can be used for the practical assessment of schemes and policies. Secondly it describes new research to update the data and improve techniques. Thirdly it explains the limitations and complications of Benefit Cost Analysis to guide decision making on investment in river and coastal risk management schemes.
