and business background to wireless developers covering numerous facets of wireless web software geared toward today's mobile platforms and mobile devices. Wireless technologies including wireless HTML, WAP 2.0, XML, Palm OS, WCA, and i mode are discussed in detail with individual chapters devoted to each. Author and industry veteran Ray Rischpater places special emphasis on the differences between the Web and the wireless Web and even between wireless devices themselves, helping the reader to better understand the engineering and interface issues that must be addressed when creating wireless web applications. By providing the latest information about technologies that have emerged since the first edition was published, i mode, the growing emphasis on XML in wireless and WAP 2.0, as well as relegating to historical status those technologies that have failed the test of time, Microsoft Mobile Channels and HDML, Rischpater offers readers a comprehensive and completely updated guide to the latest wireless technologies and development strategies.

Programming the Web with Visual Basic .NET Constance Petersen, Lynn Torkelson, 2002-07-16. Programming the Web

with Visual Basic .NET is a comprehensive guide to building web applications and services using Visual Basic .NET. It is written especially for experienced Visual Basic programmers who use Visual Studio .NET for their development work even those who have never written a web application before. Because the .NET Framework simply blows away the archaic tools previously available to web programmers, the authors predict that many Visual Basic programmers who successfully avoided Web programming in the past will now bring their expertise to the Web. However, even experienced web programmers will greatly benefit from the authors' thorough coverage of the ASP.NET namespaces and their clear coverage of the ADO.NET classes most important to Web applications that use relational databases for data storage. All developers will benefit from the authors' extensive practical advice based on their unique professional backgrounds about how to produce, create, high quality code and how to create professional usable websites. After reading *Programming the Web with Visual Basic .NET*, you'll understand how to build and deploy top quality professionally designed, highly usable web applications using Visual Basic .NET.

**A Developer's Guide to the Semantic Web** Liyang Yu, 2014-12-02. The Semantic Web represents a vision for how to make the huge amount of information on the Web automatically processable by machines on a large scale. For this purpose, a whole suite of standards, technologies, and related tools have been specified and developed over the last couple of years, and they have now become the foundation for numerous new applications. *A Developer's Guide to the Semantic Web* helps the reader to learn the core standards, key components, and underlying concepts. It provides in-depth coverage of both the what is and how to aspects of the Semantic Web. From Yu's presentation, the reader will obtain not only a solid understanding about the Semantic Web but also learn how to combine all the pieces to build new applications on the Semantic Web. The second edition of this book not only adds detailed coverage of the latest W3C standards such as SPARQL 1.1 and RDB2RDF, it also updates the readers by following recent developments. More specifically, it includes five new chapters on schema.org and semantic markup on Semantic Web technologies used in social networks and on new applications and projects such as data.gov and Wikidata, and it also provides a complete coding example of building a search engine that supports Rich Snippets. Software developers in industry and students specializing in Web development or Semantic Web technologies will find in this book the most complete guide to this exciting field available today. Based on the step-by-step presentation of real-world projects where the technologies and standards are applied, they will acquire the knowledge needed to design and implement state-of-the-art applications.
