reveals how the official story of improving education obscured dramatic and ultimately socially conservative changes in the purposes of schooling the nature and perception of teachers work and the design of teacher education Despite the official rhetoric Aydarova argues modernization reforms such as we see in the Russian context normalize social inequality and put educational systems at the service of global corporations As similar dramas unfold around the world this book considers how members of scholarly communities and the broader public can respond to reformers stories of crises and urgent calls for reform on other national stages This book provides an unprecedented ethnographic look into the making of national education policy The setting amazingly is Russia but the volume raises questions about how ideas become policy in other nations as well It is thus a highly provocative and fascinating case study that should get the attention of anyone interested in national and global education policymaking Kathryn Anderson Levitt coeditor of *Comparing Ethnographies* *Local Studies of Education Across the Americas*
