The Role of Language in Content

Pedagogy Lay Hoon Seah, Rita Elaine Silver, Mark Charles Baildon, 2022-11-01. This book explores the importance of language in content learning. It focuses on teachers' roles, knowledge, and understanding of language in school contexts, including academic language and disciplinary languages to support students. It examines teachers' language-related knowledge base for content teaching, which includes teachers' knowledge of and about language, knowledge of their students, and their pedagogical knowledge. This book also explores how teachers' knowledge of language, students, and content are linked as part of a larger pedagogical content knowledge, which includes knowledge of the role of language in content learning. As well, it further considers literacy and literacies as part of this examination of teachers' knowledge of language.

Traffic and Transport Psychology Geoffrey Underwood, 2005-06-09. Just as our transport systems become more and more important to our economic and social well-being, so they become more and more crowded and more at risk from congestion, disruption, and collapse. Technology and engineering can provide part of the solution, but the complete solution will need to take account of the behaviour of the users of the transport networks. The role of psychologists in this is to understand how people make decisions about the alternative modes of transport and about the alternative routes to their destinations; to understand how novice and other vulnerable users can develop safe and effective behaviours; how competent users can operate within the transport system optimally and within their perceptual and cognitive limitations. The contributions to this volume address these issues of how the use of our transport systems can be improved by taking into account knowledge of the behaviour of the people who use the systems. Topics discussed include driver training and licensing, driver impairment, road user attitudes and behaviour, enforcement and behaviour change, driver support systems, and the psychology of mobility and transport mode choice. This work will be of value not only to psychologists but to all transport professionals interested in the application of psychology to traffic. Automated Data Analysis Using Excel Brian D.
