The Law of Air Navigation Services Francis Schubert, 2024-12-09 Written by one of the leading experts in the field this book builds upon three decades of practical experience and legal research to provide a comprehensive exposition of the regulatory framework applied to Air Navigation Services ANS Francis Schubert sets out the regulations that States are required to establish in order to support the safety and efficiency of international civil aviation

The Public International Law of Trade in Legal Services David Collins, 2018-11-08 Explores the international legal regime covering trade in legal services considering major barriers and potential benefits to the global economy

Contract Law and Economics Gerrit de Geest, 2010-10 This unique and timely book offers an up to date clear and comprehensive review of the economic literature on contract law The topical chapters written by leading international scholars include precontractual liability misrepresentation duress gratuitous promises gifts standard form contracts interpretation contract remedies penalty clauses impracticability and foreseeability Option contracts warranties long term contracts marriage contracts franchise contracts quasi contracts behavioral approaches and civil contract law are also discussed This excellent resource on contract law and economics will be particularly suited to contract law scholars law teachers policy makers and judges For experts in and practitioners of contract law this will be a key book to buy

Justifying Contract in Europe Martijn Willem Hesselink, 2021 This title uses contemporary political theories to address fundamental questions on European contract law It also places these theories in the context of the current European contract law landscape This book highlights future options for contract law in the EU and how it may need to change

Litigation Services Handbook Roman L. Weil, 2010-04-26 In the last twenty years the need for a financial expert to act as a witness

and consultant to litigating attorneys has grown even more than litigation itself This handbook includes all aspects of litigation services including current environments the process itself a wealth of cases how to prove damages and practical considerations of court appearances It thoroughly covers the fine points of trial preparation and testimony presentation Also discussion is offered for understanding Sarbanes Oxley rulings and fraud investigations Accountants and attorneys working in litigation will benefit from this book Non-Discrimination in International Trade in Services Nicolas F.

Diebold,2010-10-21 The principle of non discrimination is fundamental to the regulation of international trade in goods and services In the context of trade in goods the concept of like products has become a key element of the legal analysis of whether a trade obstacle violates GATT non discrimination obligations The equivalent concept of like services and service suppliers in GATS rules on non discrimination has received little attention in WTO jurisprudence In light of the remaining uncertainties Nicolas Diebold analyses the legal problems of the GATS like services and services suppliers concept using a contextual and comparative methodology The likeness element is not analysed in isolation but in context with less favourable treatment and regulatory purpose as additional elements of non discrimination The book also explores how far theories from non discrimination rules in GATT NAFTA BITs and EC as well as market definition theories from competition law may be applied to likeness in GATS *The Liberalization of Maritime Transport Services* Benjamin Parameswaran,2012-12-06

Despite multiple efforts on the bilateral regional and multilateral level to create uniform or at least harmonized rules for commercial operations and practices in the maritime transport sector and to liberalize maritime transport services by tearing down the barriers that exist in that sector there is until today no global regime regulating or rather deregulating the supply of maritime transport services and ensuring open markets In this situation private economic actors are confronted with substantial legal uncertainty This book provides a detailed analysis of the history of maritime transport services in the Uruguay and post Uruguay Round negotiations and the role of the sector in the ongoing Doha Round talks where Member States have the opportunity to work towards a global regime ensuring the progressive liberalization of the sector The reader will be confronted with an extensive overview of the role of maritime transport services in the WTO GATS framework a topic basically uncovered in the literature so far

Rules for Trade in Services 2.0 Gabriel Gari,2024-06-24 This book explores the adapting process of the General Agreement on Trade in Services GATS to a constantly changing trade and policy context The adoption of the General Agreement on Trade in Services GATS a multilateral agreement with stand alone rules and principles for the governance of trade and investment in services represented a watershed in the history of global trade governance Over three decades after the drafting of the Agreement WTO Members struggle to deliver on the GATS mandate to achieve progressively higher levels of trade liberalisation in a radically different trade and policy landscape Against this background this book examines the contribution of the WTO negotiating adjudicative and deliberative functions to adapting the GATS to changing circumstances The book uncovers an extremely flexible and adaptable agreement whose full potential

has yet to be realised due to a complex set of factors weighing more broadly on the use of the WTO functions The book distils the factors at play that constrain WTO Members capacity to adapt the Agreement to changing circumstances and explores potential pathways to overcome them The book will be of interest to scholars policy makers and trade diplomats interested in understanding the factors and processes conditioning the adaptation of a multilateral trade agreement to changing trade and policy circumstances

Exporting Services Arti Grover Goswami,Aaditya Mattoo,Sebastian Saez,2011-11-15 Through country case studies as well as econometric analysis this book attempts to identify the factors that have helped developing countries succeed in exporting services It examines strategies that have been successful as well as those that have not delivered expected results

Big Data, Databases and "Ownership" Rights in the Cloud Marcelo Corrales Compagnucci,2019-11-02 Two of the most important developments of this new century are the emergence of cloud computing and big data However the uncertainties surrounding the failure of cloud service providers to clearly assert ownership rights over data and databases during cloud computing transactions and big data services have been perceived as imposing legal risks and transaction costs This lack of clear ownership rights is also seen as slowing down the capacity of the Internet market to thrive Click through agreements drafted on a take it or leave it basis govern the current state of the art and they do not allow much room for negotiation The novel contribution of this book proffers a new contractual model advocating the extension of the negotiation capabilities of cloud customers thus enabling an automated and machine readable framework orchestrated by a cloud broker Cloud computing and big data are constantly evolving and transforming into new paradigms where cloud brokers are predicted to play a vital role as innovation intermediaries adding extra value to the entire life cycle This evolution will alleviate the legal uncertainties in society by means of embedding legal requirements in the user interface and related computer systems or its code This book situates the theories of law and economics and behavioral law and economics in the context of cloud computing and takes database rights and ownership rights of data as prime examples to represent the problem of collecting outsourcing and sharing data and databases on a global scale It does this by highlighting the legal constraints concerning ownership rights of data and databases and proposes finding a solution outside the boundaries and limitations of the law By allowing cloud brokers to establish themselves in the market as entities coordinating and actively engaging in the negotiation of service level agreements SLAs individual customers as well as small and medium sized enterprises could efficiently and effortlessly choose a cloud provider that best suits their needs This approach which the author calls plan like architectures endeavors to create a more trustworthy cloud computing environment and to yield radical new results for the development of the cloud computing and big data markets

Regulating Public Services Emmanuelle Auriol,Claude Crampes,Antonio Estache,2021-10-21 This book provides the tools needed to analyse the present and the future of economic regulation
