[Prizing Scottish Literature](#) Stevie Marsden, 2021-02-15 This cultural history of the Saltire Society Literary Awards demonstrates the significance the awards have had within Scottish literary and cultural life It is one

piece of the wider cultural award puzzle and illustrates how far from being parochial or niche lesser known awards whose histories may be yet untold play their own role in the circulation of cultural value through the consecration of literary value The study of the Society's Book of the Year and First Book of the Year Awards not only highlights how important connections between literary awards and national culture and identity are within prize culture and how literary awards and their founding institutions can be products of the socio political and cultural milieu in which they form but this study also illustrates how existing literary award scholarship has only begun to scratch the surface of the complexities of the phenomenon This book promotes a new approach to considering literary prizes proposing that the concept of the literary awards hierarchy can contribute to emerging and developing discourses pertaining to literary and indeed cultural prizes more broadly *The Victoria Magazine* Anonymous,2022-04-27 Reprint of the original first published in 1863 **New Jersey Dreaming** Sherry B. What is diffusion Matter flows diffused spontaneously from areas of high density to areas of low density We will explore the techniques for this phenomenon in quantum and metaphysical systems Let s give an example from matter for example to burn wood a high fire energy is required first and as it burns it starts to burn more easily because it is the oxygen inside the wood that is burning and as it burns a larger area is opened and the bonds between oxygen molecules expand thus burning more easily Now let s move on to another explanation in order to conceptualize something a system is required a starting point and an end point must be determined Let s give an example of this let s take a coffee shop for example it needs to be within a triple system it needs to have limitations so that it can do business Where is the final limit A certain quality is required an acceptable texture let s call it drinkable coffee What is drinkable coffee It s based on the matching of price and quality in other words efficiency So what is productivity Obtaining something of a certain quality in a certain quantity per unit of time is what we call preconception So what do we do when we want to change a situation We make tradeoffs between speed quantity and quality but the system remains structurally unchanged No matter what the interior angles of a triangle are no matter its shape it s still a triangle So productivity is the key and what is productivity It s nothing but an illusion in the mind What else It s nothing more than illusions within a simulation That is a consciousness I deliberately call it consciousness I haven t said consciousness yet when I say consciousness here I point to the limited perception of man I will call the man with limited perception consciousness here When a consciousness is in an axiomatic state it thinks and assumes that it operates according to certain laws of nature but it doesn t This is because it falls into its own echo chamber that is into the realm of chaos as a result of giving birth to illusions from one illusion to another Chaos theory is the cause and to escape it it instructs the conscious mind to read a new code This code is an attempt based on efficiency in other words the attempt itself is an illusion These create a kind of composition a form I ll go back to the coffee shop example The coffee shop makes and sells filter coffee It s drinkable no one complains they pay for it and drink it In other words a line has been drawn quality has been achieved Quality according to what A quality developed based on a certain illusion Now let us look at the reality of nature itself how things matter and even the cosmic system move Matter is in a state of diffusion meaning it flows towards areas of lower density So if this is the case in the cosmic system in nature why doesn t the human mind or the system we call consciousness act this way Instead of diffusion why does it confine itself within

the triangular system and remain there Let's return to this human consciousness acts this way because it acts to achieve a certain result based on a premise we call efficiency Okay now how does this happen within quantum mechanics and the metaphysical system Let's consider this but first let's briefly examine what a metaphysical person is like A metaphysical person is someone who wants to go beyond simulation and illusion or someone who wants to create their own simulation because in total each of them will be a simulation
