Results from the Heart Kiyoshi Suzuki, 2010-05-11 Results from the Heart introduces a new and helpful approach to improving job performance improving job satisfaction and helping organizations better respond to the rapid changes that are an inherent part of today's business environment Mr Suzuki recognizes that a motivated and engaged workforce should be part of any strategy to obtain and maintain competitive advantage Carl Stern CEO The Boston Consulting Group Since the publication of Frederick Taylor's The Principles of Scientific Management managers have relied on logic to compel action Now Kiyoshi Suzuki one of the world's leading experts on enlarging the talents self esteem and growth of the individual employee argues that logic alone cannot move people to act Productivity problems are inextricably linked to self esteem he argues and worst of all to a prodigious waste of individual talent But each solution is personal Suzuki concludes and found

only within ourselves To find meaning and purpose at work we must use our brain Suzaki says but listen to our heart In Zenlike fashion he proposes that each of us ask ourselves a series of questions to determine the degree to which our brain is engaged with our heart The framework around which this selfquestioning takes place is a groundbreaking concept that Suzaki calls the mini company The author demonstrates how within the larger workplace each job is endowed with an almost spiritual meaning when each person at every level becomes president of his or her own area of responsibility With simple diagrams Suzaki shows how your boss becomes your banker or venture capitalist and your peers become your immediate suppliers or customers The results are nothing short of astonishing In Results from the Heart Suzaki describes thousands of mini companies he has founded during his worldwide consulting assignments In most cases in which unhappy employees had previously followed instructions like robots there have been spectacular increases in both morale and productivity If it is true that work is a journey this manifesto for a more humane definition of the way we work is the roadmap

Causal Models :

How People Think about the World and Its Alternatives Steven Sloman Professor of Psychology Brown

University,2005-07-02 Human beings are active agents who can think To understand how thought serves action requires understanding how people conceive of the relation between cause and effect between action and outcome In cognitive terms how do people construct and reason with the causal models we use to represent our world A revolution is occurring in how statisticians philosophers and computer scientists answer this question Those fields have ushered in new insights about causal models by thinking about how to represent causal structure mathematically in a framework that uses graphs and probability theory to develop what are called causal Bayesian networks The framework starts with the idea that the purpose of causal structure is to understand and predict the effects of intervention How does intervening on one thing affect other things This is not a question merely about probability or logic but about action The framework offers a new understanding of mind Thought is about the effects of intervention and cognition is thus intimately tied to actions that take place either in the actual physical world or in imagination in counterfactual worlds The book offers a conceptual introduction to the key mathematical ideas presenting them in a non technical way focusing on the intuitions rather than the theorems It tries to show why the ideas are important to understanding how people explain things and why thinking not only about the world as it is but the world as it could be is so central to human action The book reviews the role of causality causal models and intervention in the basic human cognitive functions decision making reasoning judgment categorization inductive inference language and learning In short the book offers a discussion about how people think talk learn and explain things in causal terms in terms of action and manipulation
