Weather Studies - Textbook and Investigations Manual Academic Year 2013 - 2014 and Summer 2014 American Meteorological Society, 2013-08-01 **Western Disturbances - An Indian Meteorological Perspective** A.P.

Dimri, Amulya Chevuturi, 2016-02-09 This book examines the meteorological phenomenon known as Western Disturbances WDs and traces their influence on the Indian subcontinent. It fully details the unique characteristics and dynamics of these disturbances which produce large scale instabilities in the atmosphere over northern India due to the orographic influence of the Himalayas. The authors first present a definition of the phenomenon and then go on to detail their structure and migration. Topics include dynamics, energetics and thermodynamics, modelling, studies, land use and land cover interactions and WDs in the changing climate. In addition, coverage outlines how WDs interact with and influence other weather systems throughout the four seasons of Indian climate: winter, pre monsoon, monsoon and post monsoon. It places special emphasis on wintertime dynamics since WDs significantly contribute to the precipitation in India during this time. The authors explain why this period should be termed Indian winter monsoon and differentiate it from the northeast monsoon which so far is the prevalent term used in the region's meteorological parlance. Complete with detailed illustrations and case studies, this monograph will help researchers and students gain a fundamental understanding of these important storms. This knowledge is essential not only for short term and seasonal hydrometeorological forecasting but also for the assessment of regional climate change and its impacts. American Meteorological Society, American Meteorological Society. Education Program, 2012-07-01 *Sensorial Investigations* David Howes, 2023-03-16 David Howes's sweeping history of the senses in the disciplines of anthropology and psychology and in the field of law lays the foundations for a sensational jurisprudence or a way to do justice to and by the senses of other people. In part 1 Howes demonstrates how sensory ethnography has yielded alternative insights into how the senses function and argues convincingly that each culture should be approached on its own sensory terms. Part 2 documents how the senses have been disciplined psychologically within the Western tradition starting with Aristotle and moving through the rise of Lockean empiricism and cognitive neuroscience. Here Howes presents an anthropologically informed critique of experimental and cognitive psychology, sensory science and phenomenology. In part 3 he introduces the paradigm of the historical anthropology of the senses and sensation and applies it to the analysis of trade relations between Europe and China in the early modern period to the treaty making process in North America during the colonial period and to all the unresolved disputes over land rights and Indigenous sovereignty that continue to this day, arguing that these differences are rooted in a cultural clash of sensoria. Designed for the classroom, *Sensorial Investigations* displays an expansive critical engagement with generations of scholarship. It is essential reading for students and scholars of the history and anthropology of the senses, the psychology of sensation and socio-legal studies. **Future Earth** Diana Dalbotten, Gillian Roehrig, Patrick
