Web Application Project Report:

Case Studies in Secure Computing Biju Issac, Nauman Israr, 2014-08-29 In today's age of wireless and mobile computing network and computer security is paramount *Case Studies in Secure Computing Achievements and Trends* gathers the latest research from researchers who share their insights and best practices through illustrative case studies This book examines the growing security attacks and countermeasures in the stand alone and networking worlds along with other pertinent security issues The many case studies capture a truly wide range of secure computing applications Surveying the common elements in computer security attacks and defenses the book Describes the use of feature selection and fuzzy logic in a decision tree model for intrusion detection Introduces a set of common fuzzy logic based security risk estimation techniques with examples Proposes a secure authenticated multiple key establishment protocol for wireless sensor networks Investigates various malicious activities associated with cloud computing and proposes some countermeasures Examines current and emerging security threats in long term evolution backhaul and core networks Supplies a brief introduction to application layer denial of service DoS attacks Illustrating the security challenges currently facing practitioners this book presents powerful security solutions proposed by leading researchers in the field The examination of the various case studies will help to develop the practical understanding required to stay one step ahead of the security threats on the horizon This book will help those new to the field understand how to mitigate security threats It will also help established practitioners fine tune their approach to establishing robust and resilient security for next generation computing systems

A Beginner's Guide To Web Application Penetration Testing Ali Abdollahi, 2025-01-07 A hands on beginner friendly intro to web application pentesting In *A Beginner's Guide to Web Application Penetration Testing* seasoned cybersecurity veteran Ali Abdollahi delivers a startlingly insightful and up to date exploration of web app pentesting In the book Ali takes a dual approach emphasizing both theory and practical skills equipping you to jumpstart a new career in web application security You'll learn about common vulnerabilities and how to perform a variety of effective attacks on web applications Consistent with the approach publicized by the Open Web Application Security Project OWASP the book explains how to find exploit and combat the ten most common security vulnerability categories including broken access controls cryptographic failures code injection security misconfigurations and more *A Beginner's Guide to Web Application Penetration Testing* walks you through the five main stages of a comprehensive penetration test scoping and reconnaissance scanning gaining and maintaining access analysis and reporting You'll also discover how to use several popular security tools and techniques like as well as Demonstrations of the performance of various penetration testing techniques including subdomain enumeration with Sublist3r and Subfinder and port scanning with Nmap Strategies for analyzing and improving the security of web applications against common attacks including Explanations of the increasing importance of web application security and how to use techniques like input validation disabling external entities to maintain security Perfect for software engineers new

to cybersecurity security analysts web developers and other IT professionals A Beginner s Guide to Web Application Penetration Testing will also earn a prominent place in the libraries of cybersecurity students and anyone else with an interest in web application security

Investigation and implementation of Shibboleth SSO authentication mechanism through a specific scenario Gilles Rubens Badouet,2013-10-16 This work titled Investigation and implementation of Shibboleth SSO mechanism through a case scenario presents discusses describes and explains the major aspects and concepts of Shibboleth protocol and provides two related prototypes implementations of the protocol within a set of chosen tools and environments The implementation relies on the project client specifications and recommendations and therefore follows some imposed deployment infrastructures The work report first focuses on the research investigation in Shibboleth concepts its relationship with similar mechanisms and its particularities in the Single Sign On mechanism alongside with its federation principles It also emphasizes on the SAML Security Assertion Mark up Language the protocol that Shibboleth implements and on which it relies The second major part of this report describes step by step the installation deployment and configurations of Shibboleth in working prototypes within Windows based Operating Systems The primary prototype implementation is a sort of initial deployment carried out within a self defined ad hoc environment helping to implement the second prototype Considered in this project as the real time prototype as it has been conducted within the client premises the second prototype has some similar steps of the primary implementation and is much more complete in terms of applications integrations and the Shibboleth log out mechanism It also focuses more on the client specifications The end of this real time prototype provides the integration strategy of 247lib com 247libDE application A testing approach is then provided to demonstrate how successful sample of simple applications have been integrated into the implementation The test illustrates with details description the main use case scenario of authentication through the Shibboleth based single sign on mechanism The appendix part of this report and the CD bound to the report include the configuration files of the project implementation the testing data and other project details The project report finally discusses the encountered risks and issues faced throughout the project progress alongside with a critical appraisal and recommendations for future works

Advanced Web Technologies and Applications Jeffrey Xu Yu,Xuemin Lin,Hongjun Lu,Yanchun Zhang,2004-03-15 The Asia Paci c region has emerged in recent years as one of the fastest g wing regions in the world in the use of Web technologies as well as in making signi cant contributions to WWW research and development Since the rst Asia Paci c Web conference in 1998 APWeb has continued to provide a forum for researchers professionals and industrial practitioners from around the world to share their rapidly evolving knowledge and to report new advances in WWW technologies and applications APWeb 2004 received an overwhelming 386 full paper submissions including 375 research papers and 11 industrial papers from 20 countries and regions A tralia Canada China France Germany Greece HongKong India Iran Japan Korea Norway Singapore Spain Switzerland Taiwan Turkey UK USA and Vietnam Each submission was carefully reviewed by

three members of the program committee Among the 386 submitted papers 60 regular papers 24 short papers 15 poster papers and 3 industrial papers were selected to be included in the proceedings The selected papers cover a wide range of topics including Web services Web intelligence Web personalization Web query processing Web mining text mining data mining and knowledge discovery XML database and query processing workflow management E-commerce data rehousing P2P systems and applications Grid computing and networking The paper entitled Towards Adaptive Probabilistic Search in Unstructured P2P stems co-authored by Linhao Xu Chenyun Dai Wenyuan Cai Shuigeng Zhou and Aoying Zhou was awarded the best APWeb 2004 student paper Environmental Change and Security Project Report, 2002

Internationalization, Design and Global Development Nuray Aykin, 2009-07-15 This volume constitutes the refereed proceedings of the Third International Conference on Internationalization Design and Global Development IDGD 2009 held in San Diego CA USA in July 2009 in the framework of the 13th International Conference on Human Computer Interaction HCII 2009 with 10 other thematically similar conferences The 57 revised papers presented were carefully reviewed and selected from numerous submissions The papers accepted for presentation thoroughly cover the entire field of internationalization design and global development and address the following major topics cross-cultural user interface design culture community collaboration and learning internationalization and usability ICT for global development and designing for e-commerce eBusiness and eBanking *Soft Computing and Signal Processing* V. Sivakumar Reddy, V. Kamakshi Prasad, Jiacun Wang, K.T.V. Reddy, 2022-02-15 This book presents selected research papers on current developments in the fields of soft computing and signal processing from the Fourth International Conference on Soft Computing and Signal Processing ICSCSP 2021 The book covers topics such as soft sets rough sets fuzzy logic neural networks genetic algorithms and machine learning and discusses various aspects of these topics e.g. technological considerations product implementation and application issues

Advanced Information Networking and Applications Leonard Barolli, 2023-03-14 Networks of today are going through a rapid evolution and there are many emerging areas of information networking and their applications Heterogeneous networking supported by recent technological advances in low-power wireless communications along with silicon integration of various functionalities such as sensing communications intelligence and actuators are emerging as a critically important disruptive computer class based on a new platform networking structure and interface that enable novel low-cost and high-volume applications Several of such applications have been difficult to realize because of many interconnection problems To fulfill their large range of applications different kinds of networks need to collaborate and wired and next-generation wireless systems should be integrated in order to develop high-performance computing solutions to problems arising from the complexities of these networks This volume covers the theory design and applications of computer networks distributed computing and information systems The aim of the volume Advanced Information Networking and Applications is to provide latest research findings innovative research results methods and development

techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications

Professional Visual Studio 2012 Bruce Johnson, 2012-11-28 The ultimate developers guide to Visual Studio 2012 This expert Wrox guide is what you need to get up and running quickly on Visual Studio 2012 Written by a Microsoft Visual C MVP it guides you through the integrated development environment IDE showing you how to maximize all new tools and improvements Offers programmers a fast way to IDE centric programming success Demonstrates new IDE features including the new Metro style app project templates and Windows 8 app store features Explains each feature then illustrates the context in which it will help you solve problems Covers timely and essential topics related to rich client app development web applications application services file configuration debugging and testing and more Helps advanced users customize and extend Visual Studio through the Automation Model writing macros working with the Managed Extensibility Framework MEF and more Provides ample detail for programmers who are new to Visual Studio 2012 as well as for experienced programmers exploring the advanced capabilities of the IDE Professional Visual Studio 2012 uses a unique IDE centric approach to help you get up and running quickly on this exciting new release
