Gathering a broad range of new developments in one place, *The Handbook of Emergent Technologies in Social Research* offers comprehensive up-to-date thinking on technological innovations. In addition to addressing how to effectively apply new technologies such as the internet, mobile technologies, geospatial technologies, GPS, and the incorporation of computer-assisted software programs, CAQDAS, to qualitative, quantitative, and mixed methods approaches to research projects, many chapters provide in-depth examples of practices within both disciplinary and interdisciplinary environments and outside the academic world in multi-media laboratories and research institutes. Not only an authoritative view of cutting-edge technologies and their applications, the Handbook examines the costs and benefits of utilizing new technologies on the research process, the potential misuse of these techniques for methods practices, and the ethical and moral dimensions of emergent technologies, especially with regard to issues of surveillance and privacy. *The Handbook of Emergent Technologies in Social Research* is an essential resource for research methods courses in various fields, including the social sciences, education, communications, computer science, and health services, and an indispensable guide for social researchers looking to incorporate emerging technologies into their methods and practice.
