Emerging Trends in Indian School Education System Dr. A. R. Purwant,2020-06-26 Introduction On August 15 1947 India attained Independence from the British domination This gave the people of the country the first fullest opportunity to mould their educational policy according to the needs of the nation in the fast changing times But this opportunity was not free from heavy responsibilities that lay ahead for reorienting the entire system of education which apart from enabling the coming generations to develop their natural faculties may also enable them to rebuild a new India The content of learning which from the very beginning of the British era had been mainly of a general and theoretical nature had to be given a practical bias The country needed a large number of technicians engineers doctors scientists and other skilled workers who could impart a new shape to various things in the developing economy of the country which had been languishing under colonial exploitation for about two centuries These were indeed very heavy and arduous tasks and the new Government and people of the country had no option but to accept the challenge of the situation and make their best efforts to put the education in the country on right lines The most important problems in the field of education before the national governments were the expansion of facilities for mass compulsory elementary education reform of the secondary and university educational systems to develop vocational and technical education at various levels to encourage women education and also to reorganise the structure of educational administration With p view to fulfil all these objectives the Central and State Governments have been endeavouring to give a concrete shape to various programmes under the Five Year Plans We propose to discuss in detail all these efforts in the following chapters in this book This chapter however presents only a brief analysis of the main events of educational importance during the period of Planning in India

Critical Sites of Inclusion in India's Higher Education Papia Sengupta,2022-03-01 This book acquaints the reader to the often invisible ized practices and policies under the rhetoric of inclusion through theoretical and empirical analysis It emphasizes on the complexities of education policies in a multicultural state by identifying the challenges to the idea of inclusion illuminated through judicial interventions policy

frameworks and everyday experiences of individuals Higher education is imperative to empowerment in socially stratified societies marred with deep inequalities like India and many other multicultural countries Disputes over inclusion remains a critical feature in Indian higher education sector as it is viewed as facilitating access to economic opportunities and providing vertical mobility for individuals belonging to marginalized communities Higher education empowers and expands individual horizons of thought and ideas of freedom dignity equality enabling individuals to participate actively in the political sociological discourses in democratic polity Therefore policy makers political theorists and educationists have been examining the question of inclusion and education as public good Contemporary India has witnessed an unprecedented attack on academic freedom free exchange of ideas and expressions challenging the very idea of inclusion and inclusiveness
